

New Pastor Is Named to Serve Local Church

REV. HERSCHEL L. THURSTON

The Methodist Church in Canyon has a new pastor.

Rev. H. L. Thurston of Brownfield was transferred to the Methodist Church. He has served the churches of Friona and Perryton.

Rev. and Mrs. Thurston have two married daughters and one son at home, Bob, who played on the winning Perryton football team which took the Regional championship.

Rev. Thurston writes that Dr. S. H. Condon was "an inspiration to his life" while a student at Clarendon College. "Buff" Morris was one of his faithful members while he was pastor at Friona. The family will arrive at the new Methodist parsonage Thursday and Rev. Thurston will preach the first sermons of his pastorate Sunday.

Rev. Hubert Thomson, who has been pastor for the past five years, was appointed to the San Jacinto Methodist Church to succeed Rev. Edgar Neal.

Rev. Edgar A. Irvine was returned as manager of the Methodist Camp Ground in the Ceta Canyon.

Mother and Aunt of Mrs. K. E. Frieze Killed Monday p. m.

Mrs. Lige Frieze received a message late Monday afternoon that her mother and aunt had been killed in a wreck near Terrell and that her father was in critical condition. He was still unconscious this morning, but seemed to be somewhat improved.

Her mother, Mrs. T. T. Tanner, has been in poor health for several months and Mrs. Frieze has been called home several times to be at her bedside. Her aunt was Miss Eva Stamps. Funeral for both was held Wednesday afternoon.

According to meagre information received here, the family was out for a ride when the car collided with a truck. Two other occupants of the car were likewise badly injured in the wreck.

Mr. and Mrs. Tanner and the aunt have visited in the Frieze home here many times during the past years.

Mr. and Mrs. Frieze left immediately for Terrell.

C. E. Massey Is Here To Start Work of Canyon's Community Recreation

C. E. Massey, newly elected director of Canyon's community recreation program, arrived in Canyon Monday evening to assume his duties.

Dr. R. A. Neblett was in charge of the Rotary Club Tuesday at which time Mr. Massey outlined some of his ambitions for Canyon.

"The eyes of Texas are upon Canyon," stated the speaker as many communities are greatly interested in the success of the program which will be attempted here.

Massey played football at Hardin-Simmons and at Baylor under Coach Frank Kimbrough. He has recently been employed at Tin Top, where 32 interested families built a community recreation hall which cost more than \$15,000.

Children like to do creative work. Every club in Randall county should sponsor some kind of a project which will assist the children in their future lives.

"No progress will be effective without the interest and support of the grown ups," stated the speaker.

If Canyon decides that a play ground is among the first community needs, all kinds of donations of materials will be in order. And many hours of work will be needed from the various citizens of the community. "You will be surprised as to how quickly a park can be built and equipped when the community gets behind the project," stated Mr. Massey.

The one idea of a recreational program is to re-instate family groups, and to hold them together. Canyon has wonderful churches, and these plants should be used more than a few hours per week.

Mose people get their recreation through two channels, the radio and motion pictures. Yet six or eight men in Hollywood control both of these channels.

Mr. Massey stated that he hoped

Number 13

Five Killed on Highways During Sunday Holiday

Four persons were killed on the highway between Canyon and Amarillo early Sunday morning, and a Hereford man was killed on a farm-to-market road west of Canyon Sunday afternoon.

Two Amarillo people and two Muleshoe children were victims in the twin wrecks north of Canyon on Highway 87, and eight others were sent to Amarillo hospitals.

The children were burned to death when the family car in which they were riding with their parents was hit from the rear by a Plainview car.

A Denver truck stopped in the west lane of the highway to give aid to those in the flaming two car wreck when it was rammed in the rear by a car which killed two persons. The driver of the truck was charged with stopping his vehicle on the pavement.

Two young couples from Hereford were traveling toward Canyon Sunday afternoon when one car hit a soft shoulder on the new farm-to-market road. The man driver was killed. The other car started to Canyon for aid when his car clipped an approaching car and overturned. The passengers were brought to Neblett Hospital for treatment before being taken to Hereford by ambulance.

Two other highway accidents occurred during the day. One driver rammed a truck near Umbarger, badly wrecking his car. Two cars collided in the intersection of highways 60 and 87.

Welfare Report Is Made for Texas and For Randall County

A report on welfare administration has been given to The News which reveals that there are 179 cases of old age assistance being given in Randall county and two cases of aid to the blind. There are no cases of aid for dependent children, which is authorized by the state.

The report shows the various expenditures and receipts of the department in the 120 page booklet which has been furnished to all newspapers and public officials of this district.

Three Left For Trip to Europe

Dr. Ima Barlow and the Misses Byrl and Wilma Hixson left Amarillo by T. W. A. Tuesday morning for New York where they board the Queen Elizabeth for England and a three month's tour of various countries in Europe.

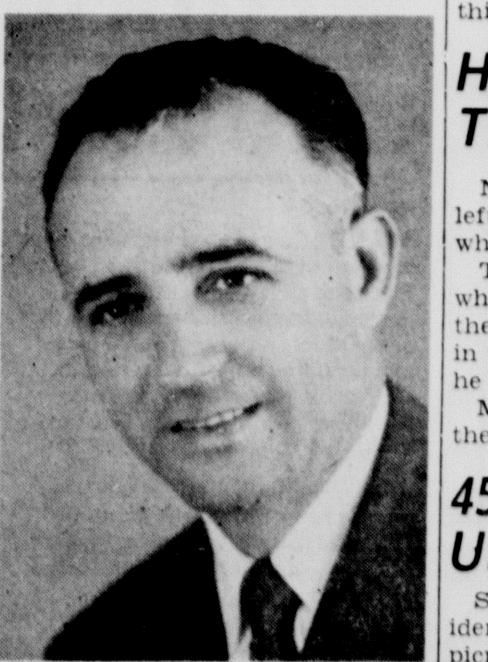

Thomson Sent to Amarillo Church

to see the fullest co-operation of the program in Canyon. Starting the program, a children's theatre where the creative incentive of the children will be developed. There are between 800 and 1,000 children in Canyon who need this work.

Mr. Massey proposed that the slogan for the recreation program be adopted, "Let's care for the children of Canyon."

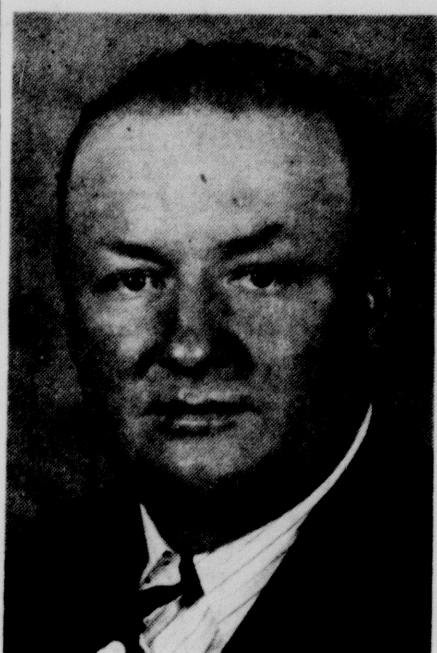

Visitors were: Lemoire Hill of Borger, Roy Wells of Huntsville, Archie Daugherty of Clovis, J. J. Slone of Houston, John and Davis Hill of Borger.

Thomson Sent to Amarillo Church

Rev. Hubert Thomson, local pastor of the Methodist Church, was transferred to the San Jacinto Church at the Annual Conference.

Math J. Albracht Is Candidate For Commissioner No. 2

MATH J. ALBRACHT

The News has been authorized to announce the candidacy of Math J. Albracht for the office of County Commissioner, Precinct No. 2. His statement follows:

"I have been urged by my friends in Precinct No. 2 to offer as a candidate for County Commissioner. I am making this race strictly upon my residence of the plains; my interest in good government; and my ability while I have been a citizen of the Umbarger Community.

"I was born at Nazareth in Castro County 36 years ago and have always lived in this section. I have been operator of the Gulf Service Station at Umbarger for the past four years and have engaged in farming in this community. I am married and the father of six children. I have never before sought public office.

"I wish to assure all of the voters of Precinct 2 that I have great interest in their welfare, as well as the welfare of the county as a whole. If elected I shall cooperate wholeheartedly with all members of the Commissioners Court as well as with all officials of Randall county in giving you a good administration. I feel qualified to give you a fair and square deal upon all occasions, and shall never let you down when it comes to looking after the business interests of your county.

"I have a helper in the Service Station and I have ample time to carefully look after all of the duties of this office.

"I own my home in Umbarger and am always available to meet the calls of the voters of this precinct, or of any officer of the county.

"I shall make every effort to see each and every voter in Precinct No. 2 before the Democratic primary in July, and assure you that your support will be greatly appreciated. If I should miss any voter, please accept this statement as an invitation to investigate my ability and standing in the community, and my desire to give you the best administration possible. I shall always stand for economy in government, without hurting any of the departments of our government," concluded Mr. Albracht.

Two Displaced Families To Arrive Soon

John McGehee of Wayside received a telegram Friday, informing him that the Hegedus couple for whom he has given assurance will arrive in New Orleans aboard the General Haan about June 6. He was also told that he would be notified of their arrival time in Amarillo. He replied to the Church World Service telegram immediately.

Dr. R. A. Neblett also received a letter notifying him of the nomination of Dr. and Mrs. Achmedows to his assurance. Church World Service was not able to give the date of their arrival, but hopes to have this information in the near future.

Harrells Left on Trip to Alaska

Newton Harrell and his son, Ed, left Friday by plane for Alaska where they will go on a hunting trip. They were in Alaska last year where Mr. Harrell killed a moose, the head of the animal now hanging in the First National Bank of which he is a director.

Mrs. Harrell did not accompany them on the trip.

450 Eat Dinner at Umbarger Sunday

Sunday was a big day for the residents of Umbarger as the annual picnic dinner was served at the community Parish Hall.

More than 450 persons were served dinner at noon. In addition to those from the immediate vicinity, many were present from Canyon, Amarillo, Hereford, Vega and Nazareth.

Traffic Check Being Made on Country Roads

A traffic count is being made on the highways and country roads of Randall county by T. E. Wright, Highway Planning Survey Department.

Mr. Wright says that he is running into difficulties in this section, particularly in Randall and Deaf Smith counties. He asks the full cooperation of all citizens in making a fair count of the traffic.

A tube is run across the road or highway being checked for the purpose of getting the axle count, or the number of vehicles which travel a certain road over a given period. When a car or truck passes over the rubber tubing, an automatic clock at the side of the road registers the vehicle.

Two types of interference have been disclosed in this section, which are very detrimental to the work of the department:

First, some folks get the idea that the check is being made for the purpose of determining the need of a farm-to-market road. Because of this false impression they will back up and go forward over the tubing several times, thus running up the clock and giving a false report of the number of vehicles which use this road. Mr. Wright says that his department usually catches such discrepancies and therefore this check is disregarded.

Second, much damage is being done by boys fastening the rubber tubing to the rear of their cars and pulling it to pieces. This is the most serious damage, and is punishable by law on the charge of destroying public property.

Mr. Wright hopes that he will receive full cooperation of all citizens. He does not wish to report either a false check or damage to the state's equipment. He is running about 30 checks daily with automatic devices. In addition to this sort of check, individual checks are made regularly on all highways by men stationed at vital points who count the passing vehicles and classify them.

County Has Fair Record in the Sale of Savings Bonds

According to a report from the treasury department, Randall county has started the new drive for Savings Bonds in fair shape. The record of sales locally is on par with the other West Texas counties which are hit by the continued drought.

During the first week of May, the sale of Savings Bonds amounted to \$6,768.75. The accumulative total for the year was \$164,250.00.

According to the report of May 20, Randall county has reached 3.61% of the quota of bonds of \$78,000.

LIBERTY BELL REPLICA TO VISIT HERE

Citizens of Randall county are invited to be in Canyon on Friday afternoon, June 2, between the hours of 1:00 o'clock and 3:30 o'clock to see the exact duplicate of the Liberty Bell which is housed in Philadelphia.

The Liberty Bell is the emblem for the Savings Bond drive which will end on July 4th. While in Canyon every citizen is urged to buy a Savings Bond and to assist with the work of the government in encouraging thrift and savings among the people of the nation.

H. C. Pipkin, Jr. Is Candidate For District Attorney

H. C. PIPKIN, JR.

The News is authorized to announce the candidacy of H. C. Pipkin of Amarillo for the office of District Attorney, 47th Judicial District. The district is composed of Randall, Potter and Armstrong counties.

Mr. Pipkin has engaged in law practice in Amarillo since 1938, except for four years in the Army Air Force, including overseas service in the Pacific Theater.

He is the son of the late Hermon C. Pipkin, Amarillo attorney.

Mr. Pipkin is a native of Amarillo and attended Amarillo High School and the University of Texas. He is 35 years old.

He is a member of the First Baptist Church and teaches a young men's class in the Sunday School.

He is married and has one child, a daughter 6 years old. His home is at 2617 Lipscomb.

He has been associated with a prominent Amarillo legal firm.

Memorial Chapel Cornerstone To Be Laid June 9

The cornerstone of the Memorial Chapel of West Texas State College will be laid with brief ceremony at 11 o'clock on Friday, June 9.

President James P. Cornette will preside.

Rev. Joseph Finley will give the invocation.

Dr. J. A. Hill, president emeritus, will read a one page history of the chapel project and then place this, along with the list of contributors, official brochures, and other items in the corner-stone.

Wedding & Cochran, contractors, will put the stone in place under the supervision of Architect M. O. Carder.

A faculty quartet will sing "Faith of Our Fathers" and Rev. J. R. Sharp will pronounce the benediction.

Formal dedicatory exercises with a more extended program including organ music and chimes, will be held later, probably about Homecoming of West Texas State.

The public is cordially invited to both of these programs.

MARRIAGE LICENSES

Roy Lee Malone to Belda Jo Gregory, May 23.

Charles Rhea Nunley to Erma Dean Gardenshire, May 24.

Frank Loyd Stallings, Jr., to Jerry Ann Foster, May 27.

City Makes New Deal on \$95,000 Bonds

The city commission in a special session Monday evening completed negotiation of the highway bonds by accepting a modified proposal by the First of Texas Co. which is the same firm to which sale of the bonds was originally made.

Because of the city's inability to deliver the bonds within the specified 60 day limit under the terms of the sale last March 7, the purchaser elected to exercise his option of cancelling his original offer of purchase, and made a counter offer to the city to take the bonds at a discount of \$1,087.50 for the last \$30,000, which would have constituted an increase in the rate of interest to 2 1/4%. The commission refused this offer, feeling the credit rating of the city warranted a more favorable rate.

Under terms of sale agreed to Monday, the last \$44,000 of the original issue is to be refunded into a 12 year issue to carry an interest rate of 1 1/4% for the first 5 years and 2% thereafter. The overall result of this refunding operation will be to reduce the total cost to the city on the entire \$95,000 issue from \$23,622.50 as originally issued, not including the earlier proposed discount, to \$14,415 under the new agreement. This results in a net interest saving to the city of \$9,207.50, or 40% of the total interest cost under the original terms. In addition the purchaser agrees to absorb the costs of reissuing the refunding bonds. The effective interest rate on the entire issue under the new agreement is 2.0274%, which in the judgment of the commission is very favorable, and reflects the

sound financial management of the city up to this time.

Provision for payment of the \$109,415 of principal and interest obligations created by the bond issue for the highway improvement will require an average annual addition of some eight to nine thousand dollars to the city's sinking fund above the amount now required. Present tax revenues of the city will not support this increase, thus it seems certain some increase in tax rates will be necessary. The commission has deferred action on this matter until the tax rolls are completed, hoping the increase in taxable property within the city and careful equalization of assessments may enable the rate to be held to the lowest possible amount.

West Texas To Enroll Capacity Is Prediction

West Texas State will start enrollment on Friday for the summer session.

From all indications the enrollment will be larger than last summer, when a record breaking number of teachers came to improve their standing under the Gilmer-Aiken law.

Many grade school teachers of this area are required to attend summer school in order to improve their standing under the law.

According to reports the size of the summer school will depend upon the housing facilities which are available in Canyon.

Funeral For Mrs. Ada Ellen Greer Held on Tuesday

Mrs. M. T. Greer died Monday at the Neblett Hospital at the age of 61 years, 8 months and 5 days. The family has been residing 9 miles north of Dawn for the past 9 years.

The funeral was held Tuesday afternoon at the Methodist Church, with interment in Dreamland Cemetery under the direction of the Griggs-Warren Funeral Home.

Pall bearers were E. W. Shuggart, Roscoe Richardson, Ben Cummings, G. L. Davis, Luther Wesley, Hubert Pond.

Survivors are the husband; one son, Roy Greer of Canyon; four daughters, Mrs. Leona Anderson of Washington State, Mrs. Emma Howard of Umbarger, Mrs. Jessie Brummett of Canyon and Mrs. Lucille Hicks of Canyon; one brother, Edd Elliott of Alexandria, Okla.; three sisters, Mrs. Lizzie Merrell, Mrs. S. L. Meek, Miss Ammie Elliott, all of Alexandria, Okla.; and 15 grandchildren.

Error Made in the Final Filing Date Local Candidates

The News made an error of dates in last week's issue. It was stated that June 19 was the final date for filing for local public offices.

The date should have been Saturday, June 17th.

The county executive committee will meet on June 19th to draw for places on the ballots, and to assess the candidates for the purpose of holding the double primary election.

The News has a supply of the new applications for candidates, which contain the affidavit of loyalty. All candidates are required to file these applications in order to get a place on the primary ballots.

Continues At the Methodist Camp

Rev. Edgar A. Irvine was returned as manager of the Methodist Camp Ground in the Ceta Canyon at the Annual Conference.

Stork Specials

Mr. and Mrs. Joe A. White are the parents of a baby boy.

Mr. and Mrs. L. R. Coleman are the parents of a baby girl.

A son was born to Mr. and Mrs. Alvah Doak, May 15. The baby is the first great grandchild of Mrs. W. S. Myers.

A daughter was born to Mr. and Mrs. Leslie Talbert of White Deer, on May 21. Mr. and Mrs. Talbert are both ex-students of West Texas State College and she will be remembered as Ruth Thompson, daughter of Mrs. Lulu Thompson of Borger.

Mr. and Mrs. W. G. Morris and Mr. and Mrs. Clyde Hancock were Sunday evening visitors in the home of Mr. and Mrs. C. R. Hancock.

Dr. and Mrs. L. F. Sheffy left Thursday for a short trip to Oregon to visit their niece.

EDITORIAL COMMENTS

What Is the Future of Prices
Is Nation Interesting Problem

We heard a long discussion the other day which expressed opposing viewpoints of two very intelligent men, both who are looking at public questions from an entirely different standpoint.

One man said that the country was riding for a fall; that prices were too high; that labor was demanding more than it was worth; that there was certain to be a flare up in which the bubble would burst in our idiotic faces, just like it did in 1929.

The second man challenged these statements. His viewpoint was that the labor market was completely under control of men who knew what they were doing; that the union organizations were going to keep up prices with high wages and high prices on materials; that there was no danger in deficit spending; that we would never have another depression so long as we kept well balanced men in the White House.

You will see that the two men could never agree. Both were of the opinion that they were right in their viewpoint. The one was a conservative, and the other a liberal.

"Yes, and what are you going to do when you reach the point that the people—especially those on salaries—cannot buy goods manufactured by these ultra radical liberals who are demanding more than they are worth?" asked the conservative.

"That situation will never come about. Labor is so well organized that prices will be kept up, even if the government has to resort to subsidies on labor and raw materials," stated the conservative.

Thus you see that right here in this Panhandle area we have citizens who disagree as to the possibilities of a major depression, or even a minor recession. The fact that prices are increasing is some sort of an answer to the perplexing situation.

Don't you wish that you knew the answers?

Replica of Liberty Bell Will
Soon Be Shown in Canyon

If the famous old bell which is housed in Philadelphia could be removed to Canyon, thousands of persons would flock here to see it.

Since it is impossible to remove the historic bell from its home in Philadelphia, and since it has been possible to cast a replica bell which looks exactly like the historic bell, with the exception of the crack in the bell, every citizen of Randall county should have the opportunity to see the replica of the famous old bell.

This bell will visit Canyon on Friday afternoon at 1:30 o'clock, and will be here until 3:00 o'clock.

The bell is a symbol of the privileges which we enjoy in this great nation of ours. It stands for freedom, which we enjoy and which we cherish—or should cherish so much.

Be in Canyon and see the bell. While the people of the Southwest are historically minded, as witnessed by the Panhandle-Plains Historical Society, too few of us have had the opportunity of visiting the national historical spots of the nation in the east. This one great object of our nation is being brought to us without our asking for it.

Quality—Not Quantity Really
Counts When Census Is Taken

Just what is the difference as to whether Canyon has 3,000 or 5,000 population? The difference of 2,000 people will not improve Canyon unless all of the 2,000 extra folks are persons with high ideals and willing to work for the benefit of the town.

Yes, and why should the people of Amarillo be so upset if that good city does not reach upward toward the 100,000 mark? Supposing Lubbock does have a larger population than Amarillo. Certainly the quality of citizenship should be taken into consideration in this census count. We do not infer that all of the population of Lubbock is so terribly bad; and certainly not all of the population of Amarillo are angels!

Population is a mere relative quantity. A town may have a big population, composed of a lot of undesirables; or it may have a small population, composed of the best people on earth.

Canyon is not a large town—and we are proud of this fact—but it has the best people on earth.

Congress Adopts Part of the
Hoover Plan Reorganization

Congress is unwilling to go along with Herbert Hoover on all his plans for reorganization of the government. However, it must be kept in mind that of the 16 proposals so far presented by the President, only three have been rejected.

Those which have been adopted are of much greater value to the nation than the ones which were rejected. Reforms in government are slow in adoption. Folks do not like to give up those things which they have enjoyed in the past.

Serious Minded Citizens

What makes the difference? We note that in every group of men whose picture appears in public print, the photographers have them pose with a smile on their faces—that is, with one exception.

Oil operators are pictured without this wierd, smiling look. Is it because they take their jobs more seriously than other groups?

Reading News on the Run

Here at The Canyon News office we get a whole bundle of exchanges, daily and weekly publications. The publisher hasn't had time to more than glance at the headlines.

Are all of you so busy that you do not have the time to carefully read the news of the day, or week?

Everybody agrees that the country needs reforms but no two persons agree upon what the reforms ought to be.

Reports are that motor vehicle traffic deaths are increasing. Be careful or you may be one of the victims.

Notice from the Government: The man who discovers uranium can rest comfortably on his ores.

Real service to your community requires more time than money, which you probably haven't got.

Not all robbing is done by breaking into a building, and some of it passes within the law.

Lieutenant Governor's Race Is
the Most Important to People

The biggest political scrap in Texas this year will be for the office of Lieutenant Governor. About a dozen men are seeking the job. Most of them are well known political leaders in Texas, and are in position to gather stronger backing from their areas of the state.

Some folks may think that the office of Lieutenant Governor is relatively unimportant. That is not the case. While few men have managed to reach the office of Governor by direct election, yet a number have succeeded to the office through death or retirement of the Governor.

Governor Hobby reached the Governor's office through the impeachment of James E. Ferguson; Coke Stevenson became Governor when Pappy O'Daniel was elected U. S. Senator; Allan Shivers reached the Governor office when Governor Jester died in office.

The office of Governor is constantly in the mind of all who seek to become Lieutenant Governor.

That is not the most important feature of the office. The Lieutenant Governor presides over the State Senate, composed of 31 members. He appoints the committees, and directs legislation. It is pretty hard to pass a measure which is opposed by the Lieutenant Governor. It is relatively easy to pass measures which are favored by the presiding officer.

Care should be taken in the selection of your next Lieutenant Governor. There are several capable candidates seeking this post.

When Is It Propaganda—and
When Are the Facts, Facts

We listened to a Chinaman speaker last week with a great deal of interest. We tried to find out what he was thinking as he talked. We could smell a good deal of propaganda in his remarks, but wondered if he was being misjudged.

The speaker held in great disdain the Chaing government, and recommended that Red China be recognized in keeping with the steps taken by England to recognize those who were winning the Chinese battle of supremacy.

The speech sounded very much like a Red was talking, with the exception of his statement that Red China would never be like Red Moscow. The Chinese are a proud people, according to his statement, and would never submit to the dictates of any outside influence.

From this one man's viewpoint, it would seem that we had bungled our opportunities in China and the entire East. He declared that MacArthur's influence was not enough to hold Japan from Red domination.

We don't know about this fellow. Maybe he was right, and maybe he was just another of those fellows who is running around the country keeping us in confusion over vital issues.

President Truman Made Gains
During His Trip to the West

It is reported that President Truman made a great hit with the immense crowds which greeted him on his western trip. He is reported by careful observers to have made votes on the tour.

Why not?

Truman is an experienced politician. He is a careful glad hander. He knows the tricks of the political trade, as a result of the careful training that he had in Missouri and later in Congress. Since going to the White House his popularity waned, but to no great extent.

It is reported that there are more Democrats than Republicans in the nation. For 18 long years the Repubs have been out and the Demos have been at the federal feed trough. A new generation of voters have come along, and they know the Democratic promises and accomplishments. The Repubs have never been able to convince any of these young voters that they had a leader to compare with Roosevelt or Truman.

And don't forget this Santa Claus stuff while you are trying to evaluate the reasons for the Truman success. Those who receive do not kick their friend in the pants.

More Traitors Than Uncovered

Why should any one turn traitor to his country in time of war? We all claim that we are such good Americans and are loyal to the principles of the American government.

Yet nearly every day we read of men who try to defraud their government in income taxes; bootleg poisonous liquor; gamble away their earnings; prostitute their lives and their well being.

We still have plenty of traitors who are trying to travel in respectable company.

Treats the Newspapers Rough

Newspaper history: New Mexicans have buried 500 weekly newspapers during its history.

There are 55 weeklies; eight semi-weeklies and 16 dailies in the state. That is the history of 576 weekly newspapers in the state which could not support so many publications.

Truman Trusts Old Friends

Newspaper headlines: "Truman appoints old friends to jobs."

Well, that is natural. Truman trusts his friends, like most humans. Not many men, either in public or private life, will trust their enemies.

More money for farmers means more money for the banker, the merchant, the manufacturer and, incidentally, for us.

Somebody figures out that the average girl spends \$5 a year on cosmetics. That's money well spent, in most instances.

The man or woman who is able to control desire and restrain appetites will not need old age pensions in later life.

Canyon can solve some of its problems if the people here will get together and think of the common good.

So far as the editor is able, The Canyon News tries not to publish hokum as news.

Interesting statistics: The world weighs 30,000,000 sextillion tons.

Disarmament is all right if all nations disarm.

1. No thank you.
2. We buy everything we need from our local merchants!

WHO
Knows

1. How many miles did President Truman travel on his recent Western trip?
 2. How many nations have signed the North Atlantic Treaty?
 3. What woman was once Governor of Wyoming?
 4. Where did the Diesel locomotive get its name?
 5. On what river is the Grand Coulee Dam located?
 6. Identify: Stanislaw Mikolayczyk?
 7. Of what country is Gen. Anastasio Somoza President?
 8. What state is known as "the Mother of Presidents?"
 9. What is the population of Haiti?
 10. What does the term "featherbedding" mean?
- (See "The Answers" on page 7)

MORTGAGE BUYING

After a two month halt, the Reconstruction Finance Corporation is about to resume buying mortgages—but with certain restrictions. The RFC's mortgage buying subsidiary, the Federal National Mortgage Association, will buy only mortgages which have been guaranteed by the Veterans Administration since March 1, and which have been held by the mortgage lender "at least two months" before being offered for purchase.

PLENTY OF COMPANY

Tommy: That problem you helped me with last night was all wrong, daddy.

Father: All wrong, was it? Well, I'm sorry.

Tommy: Well, you needn't exactly worry about it, because none of the other daddies got it right either.

NOT A SURE GUIDE

Jack: In almost every moving picture where a girl is hugged she raises her foot.

Tom: Aw, you can't go by the movies. I tried to hug a girl last night and what she raised was a bloomin' row.

Kerry Kut shorts top the best seller list for comfort and good looks. A wide front waistband with elastic inserts insures extra snugness. Gripper Fasteners for convenience. There's a smart selection of pleasing patterns to choose from. Sanforized*, of course.

Need of a Navy Is Stressed by Magazine Author

One of the most compelling essays on the importance of the Navy to the national security appeared in the March issue of U. S. Naval Institute Proceedings. Written by Captain Ernest M. Eller, U. S. N., and titled "Will We Need a Navy to Win?" it has been given the Institute's annual prize award.

Captain Eller deals generally with the influence of seapower on the course of our history. It has, as every schoolboy knows, been a decisive influence. And yet, he cogently observes, "Although the sea is the very tide of her life, America has never believed in it." The American roots are in the land. Few of us have any first-hand knowledge of the fighting Navy—in the last war three fourths of all those in the armed services wore Army or Air Force uniforms, and their loyalties, like their knowledge, lies with these arms. "Do not talk to them about the Navy winning wars," says Captain Eller. And here, he thinks, is one of the reasons why so many now believe that the Navy's day has come to its twilight, and that other weapons, primarily land-based aircraft, are about all we need.

Captain Eller, of course, does not believe this. He—like so many other experts, both within and without the Naval service—is certain that the role of the Navy in any future conflict will be all-important and that, especially, Naval carrier-based aircraft will carry much of the load. And here he writes: "If we are to suffer another war in the near future it is in the air that we must defend ourselves first of all, and by the air we must strike early blows. Such being true, we must realize that the solid earth belonging to the United States under this air, and therefore assuring us fixed bases for air protection, amounts to no more than two per cent of the area of the world. . . .

"Contrasted to this, consider that if we control the sea we control not two per cent but 70 per cent of the surface of the world! On the water we increase our potential air base locations more than 30 fold, provided we deny the oceans of the enemy and maintain sufficient floating fields of our own. We likewise insure that many other land areas otherwise denied us will serve our purposes and not those of the enemy."

Finally, Captain Eller argues, the American public has accepted a progressive reduction of its Navy below a minimum safe level because it does not see the need for it. We have, in other words, actively or passively accepted the idea that a "cheap" war is possible, and that a first-class Navy with all its vast complexities and costs, is an unnecessary luxury. If Captain Eller is right, this is one of the most dangerous of illusions, and it must be jettisoned. For, he writes at the very end of his fine essay, "In this age of winged sea power, even more than in the past, victory or defeat may come out of the sea."

News In Canyon 25 Years Ago

(Taken from the files of the Randall County News of May 28, 1925)

Edward Gerald has been named editor of The Prairie to succeed Olin E. Hinkle.

E. H. Holman has bought the interest of G. A. Farlow in the Kuehn & Farlow Ford Agency.

Coach Oscar Eckhardt was held up and robbed near Georgetown while on his way to Austin. The holdup men gave him back \$1.25 to buy gas when he told them his car was nearly empty.

County Agent J. W. Jennings estimates that the cotton acreage is about 15,000 acres.

Walker Bros. of Amarillo are opening a new variety store on the north side of the square.

Hal Harrison was hit by a car and knocked to the pavement in front of the home of his parents, Mayor and Mrs. C. N. Harrison.

Some Officials Seeking to Turn Back the Clock

In a recent statement before a House committee, the president of a great steel company strongly attacked groups in government which, he said, are seeking to dismember American business. In doing this, he went on, "they would turn back the clock to the horse and buggy days of fifty years or more ago, and would try to squeeze a modern, dynamic, efficient America once more into the puny production patterns of industrial childhood."

"Or, by subjecting American productive enterprise to the deadening hand of political regulation, they would borrow from the Old World the dismal economic philosophies that have led most of Europe to desolation and despair."

In some governmental circles there seems to be a deluded theory to the effect that business is bad if it is big—and that bigness, per se, is evidence of monopoly. Yet during the years in which the growth of business has been pronounced—both for whole industries and for companies within them—competition has grown steadily more intense. In the case of this steel company, as an example, it produced 66 per cent of all the steel made in America in 1901. In the ensuing half century its production has grown tremendously—yet now it accounts for only 33 per cent of our steel, due to the expansion of competing steel companies.

During this period of growth our living standards as a people reached new heights after new heights. Wages rose, working hours dropped, and millions upon millions of average American families bought goods and services that are regarded as the luxuries of the rich in other nations. Business made this possible—free, competitive business, both big and small.

The president of the steel company also said that big business and little business are interdependent despite the attempt to "statistically minded theorists" to create economic class distinctions. The big business creates opportunities and trade for hundreds and often thousands of small businesses.

There is no place in America for those philosophies of defeat and stultification that have impoverished Europe.

BUILDING

The record breaking home building activity, which is sweeping the nation, is creating a demand for other products, according to the Bureau of Labor Statistics, which cite increased demand for furniture, household appliances, television, building materials and a host of related industries. This, of course, is buying the unemployment situation in affected industries.

TRAFFIC DEATHS

After setting a new low record for traffic deaths in 1949, the nation is in danger of cracking up its fine postwar safety record, according to the National Safety Council. March traffic fatalities jumped 15 per cent to 2,440 as compared with 2,120 a year ago. For the first three months of this year, there were 7,060 traffic deaths, nine per cent more than in the first quarter of 1949.

EMPLOYMENT

Industrial and commercial employment increased by 636,000 between mid-February and mid-March to a total of 42,323,000 in March, about 600,000 less than in March, 1949.

Proved by 50,000-mile road test! In a 50,000-mile test, engines lubricated with Conoco Super Motor Oil showed virtually no wear at all . . . in fact, an average of less than one one-thousandth of an inch on cylinders and crankshafts.

This means that—with proper crankcase drains and regular care—Conoco Super Motor Oil can keep new-car power and performance year after year!

Come in and let me tell you about "50,000 miles no wear!"

CONOCO Super MOTOR OIL

OIL PLATES YOUR ENGINE

EMPLOYMENT UP

Employment for the months between January and March rose in three-quarters of the nation's major production centers and in two-thirds of the areas where unemployment had been heaviest, according to Robert C. Goodwin, director of the Bureau of Employment Security. Mr. Goodwin said that total civilian employment at the seasonal mid-year peak would probably rise to at least 60,000,000,000, but he warned that this post-war goal on jobs, first attained in 1947, was no longer adequate in the face of a labor force that is steadily growing.

GLAD TO GET BACK

A grandfather visited a household in which he had a little grandson who had spent part of the summer at a boys' camp. The lad talked so enthusiastically about the camp that his grandfather offered a slight reminder. "After all, though," he remarked, "you were rather glad to get home, weren't you?"

"Well," replied the lad thoughtfully, "not specially." Then after a bit he added: "Some of the fellows were—those that had dogs."

Approaching Marriage Is Announced

Mr. and Mrs. James Funston announce the engagement and approaching marriage of their daughter, Mary Ellen, to Charlie H. Pond.

Jr., son of Mr. and Mrs. C. H. Pond, Sr., of Canyon.

Vows will be exchanged July 23.

RALPH H. D. CLUB WITH MRS. JOHN LILL

The Ralph Home Demonstration Club met in regular session May 24 with Mrs. John Lill in her country home north of town.

Modern medicines was the subject discussed by Mrs. Victor Hill and Mrs. R. B. Gist.

Refreshments were served to seven members, the hostess, and two visitors, Miss Lillah Lill and Judy Linell Byars.

Mr. and Mrs. Cecil Briggs and Ted and Leroy Dickerson made a week-end trip to Abilene, Austin, and San Antonio. They left Thursday and returned Sunday.

Mr. and Mrs. A. B. Berry and family spent Sunday in Amarillo, in the home of her sister and family, Mr. and Mrs. Woodburn.

Air Conditioners — all sizes, one room apt. to average size home. Western Auto.

MUSIC IS TOPIC FOR ZITA HOME DEMONSTRATION CLUB

The Zita Home Demonstration Club met in the home of Mrs. Ralph Ruthardt, May 23. Each member present answered roll call with the title of her favorite song.

After the business session the group planned a picnic for the members and their families to be held June 11.

Announcement was made that Jimilee Jennings of the Zita 4-H Club will go to College Station as a reward for her work in the club.

The following program was presented on Modern American composers: "George Gershwin," by Martha Olson; "Edward McDowell," by Ethel Michael, and a review of "Daughter That Never Grew Up" by Pearl Buck was given by Ila Jennings.

Refreshments were served to the following: Clara Delano, Geneva Fulton, Juanita Gruner, Mary Gruner, Ila Jennings, Donabelle McCormick, Sally McCormick, Ethel Michael, Dorothy Olson, Martha Olson, Ester Olson, La Vada Rose and Helen Ruthardt.

HOUSE GUESTS HONORED WITH DINNER IN GRAHAM HOME

To honor house guests, Miss Billie Martin of Bryan and Miss Barbara Brown of Three Rivers, roommates of Miss Mable Graham while in Baylor last year, Mrs. Walter Graham entertained with a dinner last Saturday in their lovely country home.

Fried chicken and gravy, fruit salad, stuffed eggs, beans and potatoes, turnips and greens, hot rolls, strawberries, ice cream and cake, tea and lemonade were served to Marvin Cornette, Don Hickman, John Boling, Ann Crawford, Ruth Ann Soll, Nolan Henson, Jackie Cooper, Bill Cox, Bill Boston, Jerry Inman, Dorothy Carter, Tom Sifert, Laverne Hinders, Frances Gooch, Earline Davis, Milburn Hayden, Sue Dickerson, Faye Dickerson, Emma Jean Zachry, Chloe Ann Black, Bryce Slack, Harrell Slack, Dale Wegrick, Frances Standley, Loyd Johnson, Doris Johnson, Billy Cleavenger and June Jennings.

Misses Bobby, Betty and Billy Graham were co-hostesses with their mother.

Engagement Is Revealed At Announcement Shower

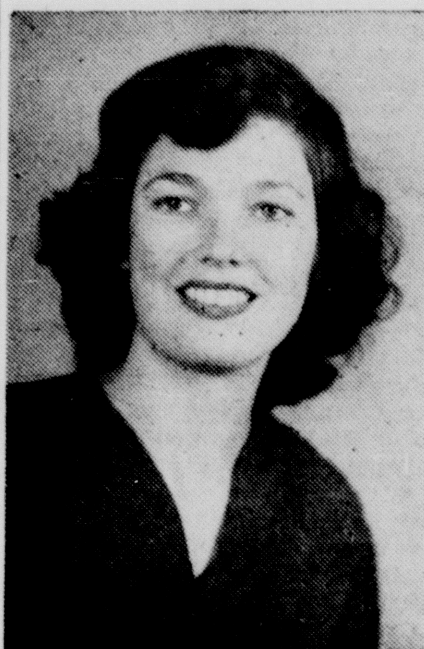

The home of Mrs. E. L. Bond, on the afternoon of May 24, was the scene of an announcement shower for Joyce Burge, daughter of Mr. and Mrs. Noel Burge of Dodson, announcing her approaching marriage to Neal Dwayne Carter, son of Mr. and Mrs. E. W. Carter of Stratford. Red and white roses were arranged about the room and a large bouquet of roses was the centerpiece of a lovely table laid with a lace table cloth.

The bride's colors of green and white were carried out with white plates and green napkins with "Joyce and Dwayne" on them.

The guests were greeted as they arrived, by Mrs. E. L. Bond and Miss Joyce Burge, hostess and honoree. Presiding at the guest book was Nancy Woods. Clara Nell Herring directed the guests as they viewed the display of gifts and serving at the punch bowl was LaVerne Baker. Those attending and sending gifts were Jerry Bannister, Joyce Hill,

Jeanne Butler, Martha Williams, Dolores Wilson, Evelyn Reed, Clara Nell Herring, LaVerne Baker, Laverne Herring, Nancy Woods, and Mrs. E. L. Bond, hostess. Those sending gifts were Margaret Baker, Marjorie Frost, Gerry Wise, Louanna Price, Marian Herrington, Mrs. Alfred Woods, and Mrs. W. H. Lewis.

Canyon Hi Girl Wins Scholarship in West Texas

JO PARKER

Jo Parker, daughter of Mr. John Parker, of Happy, has been awarded a \$100 scholarship to West Texas State College, by the Delta Zeta Chi Sorority. The award was made on the basis of scholarship, leadership, need, and merit.

Miss Parker was graduated from Canyon High School where she was Football Queen in '48-'49, Senior Class Favorite, Editor of Eagles Tale in '49, and Personality Queen, '49-'50.

SURPRISE BIRTHDAY PARTY HONORS BILLIE GRAHAM

A surprise birthday party was given for Billie Graham Tuesday afternoon, May 30.

Those present were her grandparents, Mr. and Mrs. George Abbott of Dimmitt, and W. A. Graham of Amarillo, and Mr. and Mrs. Walter McRae of Fredrick, Colorado, Patsy Vandergriff, Dorothy Neblett, Nancy Bolton, Ann and Virginia Holt, Bobbie Grigsby, and Billie Martin.

Barbara Brown, of Three Rivers, friend of Mable Graham at Baylor University, returned home Tuesday, after a visit with the Walter Graham family.

Mrs. J. B. Sutton and son, of Dallas flew to Canyon Sunday, to attend the wedding of her brother, Larry Roush, and visited in the home of the E. J. Larsons.

Mr. and Mrs. C. N. Tippery and girls of Larkin, Kansas, spent the week-end in the home of Mr. and Mrs. W. H. McAttee.

Mr. and Mrs. Bud Myers and son, Roland, of Lubbock spent the week-end in the home of his mother, Mrs. W. S. Myers.

Mr. and Mrs. John R. Pool and Susie of Vaughn, New Mexico, spent the weekend in the home of Mr. and Mrs. Max Barnard.

Mr. and Mrs. C. S. Devenport and Kathryn spent Friday night in Brownfield in the home of Mrs. Pearl Bryant.

Mrs. Vergie Smith and daughter, Billie Lois, of Los Vegas, New Mexico visited last Tuesday night in the home of Mr. and Mrs. E. S. Trout.

Miss Frances Standley has returned from Waco where she was a student in Baylor University the past year.

Mrs. W. A. Warren and son, Bernard Warren, are in Dallas and Fort Worth this week attending the dry goods market.

Capt. Roland Black of Fort Hood was here over the weekend visiting in the home of his mother, Mrs. Alice Black.

Miss Mary Frances Colwell, who has been teaching in Eunice, New Mexico, has returned to spend the summer in Canyon.

Dr. C. R. Nester, Dr. Ples Harper, Dr. J. L. Russell and Dan F. Sanders left Friday on a fishing trip to Crede, Colo.

Mrs. Walter D. Williams is spending the week in Ft. Worth with her daughter, Mrs. T. L. Cooley.

Mr. and Mrs. Ross Service and Don spent the weekend in Odessa with Mr. and Mrs. Tommy Service.

Bernard M. Baruch, retired financier; "Freedom's greatest threat today is too much government."

Lorene Seales Honored with Bridal Shower

Miss Lorene Seales, bride-elect of Weldon Benham, was honored with a bridal shower, Monday afternoon in the home of Mrs. Jeannette Robbins, 1508 Eighth Avenue.

The entertaining rooms were decorated with bouquets of spring roses and fern. Corsages of roses were presented Miss Seales, her mother, Mrs. Olga Seales, and Mrs. L. J. Benham, mother of the bridegroom-to-be.

Refreshments of cake, salted nuts, mints and punch were served from a beautiful appointed table to approximately sixty guests.

Hostesses for the afternoon were Mrs. Maude Walters, Mrs. Doris Gillham, Mrs. Wayne Davis, Mrs. Ruth A. Hill, Mrs. Robert Brotherton, and Mrs. Robbins.

CENTRAL H. D. CLUB MET IN HOOD HOME

The Central Home Demonstration Club met in the home of Mrs. S. R. Hood, Friday, May 26.

The Song of Peace was directed by Mrs. R. E. Foster with Mrs. K. E. Hines at the piano. A "Ballgame" was "unpired" by Mrs. George Barker for the opening exercise.

Mrs. W. L. Rice presided over the business session. Plans were discussed for the rose show to be held in June, and the achievement tours to be taken in September. The group selected Friday as the most suitable day for tours.

Miss Lou Ella Patterson gave an interesting demonstration on combining colors effectively when decorating your home. She displayed some lovely combinations and gave some helpful suggestions, along with some decided "do's and don'ts."

Refreshments of iced punch, jello salad, cheese sandwiches and candy mints were served to the following members: Mrs. George Barker, Mrs. Otto White, Mrs. Mae Johnson, Mrs. Fred Marshall, Mrs. Levi Cole, Mrs. W. L. Matsler, Mrs. K. E. Hines, Mrs. R. H. Long, Mrs. R. E. Foster, Mrs. W. L. Rice, Mrs. Velton Sogree, Miss Lou Ella Patterson, guest, Mrs. R. D. Lowry, and the hostess.

The next meeting will be June 9, in the home of Mrs. Fred Marshall.

Mr. and Mrs. W. T. Oliver and daughters, Mrs. Shirley Lewis and Mrs. Martha Shelton of Amarillo, Mrs. Helene Davis of Santa Ana, California and Mrs. Oliver's sister, Mrs. Sam Becker, of Brownsville left Monday for West Point where they will attend the graduation exercises in which their son, brother and nephew, Sandy, will receive his commission.

M. M. Tabor, Cisco, Texas, who was in Amarillo attending the 17th annual meeting of the Panhandle Producers and Royalty Owners Association, was in Canyon Thursday morning visiting with his sister-in-law, Mrs. Guy Tabor.

Mr. and Mrs. Ollie Buchanan returned from their honeymoon trip, Saturday and spent Saturday night in the home of her parents, Mr. and Mrs. Ray Campbell. The couple left yesterday for Oklahoma City where they will make their home.

Weekend guests in the home of Mrs. Guy Tabor were Mr. Tabor's sister, Mrs. Douglas Swanzey, and her daughter and son-in-law, Dr. and Mrs. Marshall Jolly, all of Clyde, Texas, and Mrs. Tabor's daughter and family, Mr. and Mrs. Harley Stone and sons of Lubbock.

Mrs. E. B. Shaver and grandchildren, Joan Shaver and Robbie Robertson of Knox City, visited this week in the home of their daughters and aunts, Mrs. Tom Lair and Miss Mayme Shaver.

Visitors in the home of Mr. and Mrs. O. B. Vaughan Sunday were Mr. and Mrs. N. Porterfield of Tucumcari, New Mexico. Mrs. Porterfield is Mr. Vaughan's sister.

Mrs. Frances Harp, who has been teaching in Lovington, New Mexico, has returned to spend the summer in the home of her parents, Mr. and Mrs. Guy Harp.

Houston Bright, Professor of music at West Texas State College, is in Los Angeles on business.

Public Schools Closed With a Talk by Harrell

Newton Harrell spoke at the closing exercises of the Canyon high school Thursday night. His subject was "Free Enterprise." The speaker is a graduate of the high school; an ex-student of the college and at the present time is president of the Board of Regents of six Texas teacher training institutions.

As a ranchman and business executive Mr. Harrell has observed the effort being made to undermine the influences of free enterprise and to induce state control of all features of government. This he deprecates since he came up under the free enterprise system.

Awards were made for the following outstanding work of the year: Canyon High School Plaque: Melva Martin. (Based on Citizenship, Scholarship and Achievement.)

Valedictorian: Mary Ruth Hill—highest average in scholarship for the four high school years—will receive a scholarship to state college of her choice.

Salutatorian: Martha Hales—second highest scholastic average for the four high school years.

Delta Zeta Chi Scholarship: Jo Parker—a \$100.00 scholarship to W. T. S. C.

Journalism: Melva Martin and Jo Parker (outstanding work in Journalism).

Annual Editors: Donna Erwin and Mary Ruth Hill—for editing annual.

Junior Red Cross: Leroy Dickerson (to represent school at conference this summer at Little Rock, Ark.).

English awards for highest achievement in Literature and grammar: Senior Class: Mary Ruth Hill and Mary White; Junior Class: Linda Dooley and Barbara McDougal; Sophomore Class: Richard Sanders, Charles Donnell, and Bettie Jean Graham; Freshman Class: Joy Black, Sue Ann Kinney and Carol Rose; Eighth Grade: Jerry Martin, Joe Ann Mickey and Nancy Bolton; Seventh Grade: Jean Davis and Joe Dickerson.

Daughters of the American Revolution Pin: Donna Erwin.

Bausch and Lomb Honorary Science Award: Martha Hales—exceptional work in the field of natural science.

Spelling Medals: Jane Rose, Helene Meyer and Joe Watson—the three leading spellers in the second and eighth grades.

Recognition of Boys' State Representative from Junior class: Billy Carl Morton.

Visitors in the home of Mrs. W. H. Lewis last week were her daughter and family, Mr. and Mrs. L. M. Yearout and son Don, and Mrs. Bessie McCulley of Albuquerque, New Mexico. They were enroute to Springfield, Illinois.

Mr. and Mrs. Leroy Wooten and Mrs. Bud Parker attended the Sewing Machine factory school last week in Oklahoma City, Okla.

Air Conditioners — all sizes, one room apt. to average size home. Western Auto.

PRESBYTERIAN CHURCH

There will be a meeting of the First Presbyterian Congregation, following the eleven o'clock service Sunday, June 4, to consider the calling of a pastor. Every member should try to be present.

STATE OF TEXAS, COUNTY OF RANDALL, IN THE MATTER OF PROPERTY OWNED BY P. E. YARDER

TO: The City of Canyon, Canyon, Texas.

P. E. Yarder and the unknown heirs and legal representatives of P. E. Yarder, the residences of whom are unknown, Respondents.

You are hereby notified that on the 17th day of July, 1950, at 9 o'clock, a. m., in the Randall County Courtroom in the Courthouse at Canyon, Texas, the undersigned special commissioners, appointed by the Judge of the County Court of Randall County, Texas, to assess the damages occasioned by the condemnation of the following described property to-wit:

A part of Lot 1, Block 22 of the Normal Addition to the City of Canyon, as said Lot is described on the map or plat of said Addition, of record in the Randall County Deed Records, and being more particularly described as follows:

Beginning at the NE corner of said Lot 1, thence West along the North line of said Lot a distance of 15 feet to a point, thence South parallel to the West line of said Lot a distance of 140 feet to a point on the South line of said Lot, thence East along the South line of said Lot a distance of 15 feet to the SE corner of said Lot, thence North along the East line of said Lot a distance of 140 feet to point of beginning;

for the purpose of widening U. S. Highway 87 in the City of Canyon, all of which more fully appears in a certain written statement filed by the City of Canyon on the 27th day of May, 1950, to which reference is here made, having heretofore duly selected such time and place for hearing, as required by law, will proceed to hear said written statement and act thereon in the manner directed by law.

Witness our hands this 29 day of May, 1950.

A. M. CUNNINGHAM

Attends Graduation at Memphis High

Mrs. Lee Foster accompanied Dr. and Mrs. James P. Cornette to Memphis last week to attend the graduation exercises of the Memphis High School where Dr. Cornette delivered the address.

Mrs. Foster had graduated from the present building as a member

of the first graduating class there twenty-five years ago. This was the first graduation that she had attended there since that time, and was delightedly surprised at the number of old friends that she met and recognized instantly.

Charles Owens, son of Mr. and Mrs. L. A. Owens, will be home Thursday from the University of Texas, where he is a second year law student.

Vacation Bible School at Baptist Church Starts Fri.

Vacation Bible School at the First Baptist Church will begin with registration, parade, and refreshments at 2:30 p. m., Friday, June 2.

The school is for all boys and girls 4-16 years old. Each afternoon, June

5-16, from 2:30 to 5:30, a group of volunteer workers will give their time and talents to entertain and instruct all boys and girls whose parents will enable them to attend.

The daily program consists of Bible stories, singing, handicraft, etc. Boys and girls will learn to do many things with their hands while we try to plant the truth of God in their hearts. No charge is made for this service which our church wishes to render.

Authorized Dealers for New Home Sewing Machines, portable, console and desk models on floor. Western Auto.

Mrs. J. D. Price of Plainview, Mrs. R. E. Chambers and Mrs. Bob Combee of Amarillo visited their mother, Mrs. W. S. Myers, Tuesday and assisted her in decorating family tombs in Dreamland Cemetery.

OUR DEMOCRACY—by Mat

"WHERE VALOR PROUDLY SLEEPS"

From Concord Bridge to San Juan Hill, from Flanders Field to Iwo Jima, "sleep the brave" who fought the good fight, that this free nation might remain free.

TOMB OF THE UNKNOWN SOLDIER

Deep in our hearts, on this Memorial Day, burns the hope that, in the future, men need not die that freedom may live. But only if the living are infused with the indomitable spirit of those Americans who have faced death in war, can the ideals of Our Democracy hold fast in enduring peace.

Free Enterprise Won Fame For a Small Factory

The term "free enterprise" has become so common it has lost significance. And yet it is an accurate term that cannot be avoided in describing the activities of private citizens in contrast to public or governmental undertakings.

The best way to define free enterprise and what it means to the country in terms of progress and living standards is by illustration. For example practically everyone at some time has seen or used a pressure-type gasoline lantern. The chances are that it was a Coleman lantern. A half century ago Coleman lamps brought light to cities and homes throughout the nation.

The story of the man and the company behind these lamps is a story of free enterprise that anyone can understand. It is a story of an individual who succeeded against odds. W. C. Coleman, who celebrates his eightieth birthday this year while his company celebrates its fiftieth anniversary, began with an idea and no money. Because he had a good product and tireless energy his enterprise grew and prospered. As the electric light developed Coleman expanded into oil-burning home heaters. Today in this field sales average 400,000 units annually. The Coleman plants employ 2500 people. Mr. Coleman at 80 runs the business with the help of his two sons. Within recent years he has visited every American city of over 25,000 population and 90 per cent of those over 10,000 calling on dealers who handle his products. His activities have done their bit in making the American standard of living and American goods famous. His lamps, like the oil they burn, exhibit free enterprise in a way that cannot be defined in a dictionary. It means liberty, opportunity, and progress. It cannot exist in a Welfare State.

CONSUMER INCOME

The Commerce Department reports that consumer incomes, the mainspring of retail sales, rose in March to a \$212,000,000,000-a-year level. This was a \$2,400,000,000 rise from the February annual rate and a \$1,800,000,000 gain over the level of March, 1949.

RESERVED SEATS

Suitor: Do you ever peep through the keyhole when I am sitting in the parlor with your sister?

Small brother (with a burst of candor): Sometimes, when mother ain't there.

Stassen favors U. S. reinsurance for private health plans.

FACTORY PAY

Average weekly earnings of factory workers rose to new record level of \$59.57 in mid-March, according to the Bureau of Labor Statistics, which points out that the figure, a month earlier, was \$56.37.

EXTREMELY LIGHT CONDUCT

"Twenty years ago, Madge had a notorious affair with a man, and now she's mixed up with the same man's married son."

"That's what one might call burning the scandal at both ends."

First Bridge Over Father Of Waters 97 Years Old

Late in April the four cities of Davenport, Iowa, and Rock Island, Moline and East Moline, Illinois, celebrated a unique event in American History. There 94 years before, the first locomotive rumbled across the first railroad bridge spanning the Mississippi—and bands of iron at last joined the East and West.

In the same month in which the bridge was opened it was rammed by a river steamboat. Both boat and bridge burned, and suit was brought to prevent rebuilding of the structure on the grounds that it was an obstacle to navigation. A little-known lawyer represented the railroad. His name was Abraham Lincoln. Lincoln won his case, establishing the principle that bridges carrying railroad tracks may be thrown across navigable waters. In this, the man who was to go on to become one of the greatest of the Presidents, made one of his first major contributions to the unity of his country.

The celebration in the four mid-western cities honored a high point in our history. It recalls the titanic struggles that characterized the building of the railroads less than a century ago. Men are still living

who were children then—in their lifetimes they have seen the railroads do as much as any force to build the strength and security of this nation, and to serve its homes, farms and industries in peace and in war, in good times and bad.

The building of the railroads made it possible to settle and civilize this continent. Now, a brief century later, the existence of the great railroad industry is vital to the continent's very life as a united nation.

"SPEEDY"

by

Palo Duro Motor Co.

There is such a thing in writing—as in other activities—as expressing oneself with such simplicity, naturalness and ease as to make it appear too easy.

Here's a believe-it-or-not: There was a man in early days who owned a mountain of solid rock. He decided it was so useless that he swapped it for a pony. Of course the pony died many years ago—but from that supposedly worthless mountain there was quarried the granite from which the great Capitol building of Texas was constructed.

The original owner of that mountain made the worst trade since Esau exchanged his birthright for a mess of pottage.

Sam Houston, no doubt, was the most popular man in the history of Texas—but did you know that one time he was refused permission to speak in a Texas court house? It was at Brenham and it was during a bitter campaign when secession was being debated back before the Civil War.

Houston had arisen to speak when several protested that he had no right to speak in the court house. His supporters became angry and hot words flew. But Sam raised his hand for silence and said: "Those who object are right. I am not a taxpayer in this county; I did not pay for even one brick in this court house. But if any of you want to hear me speak, follow me to

A motor rework here has its full rated horsepower — the work is superlatively done by specialists and is wholly guaranteed. Regardless of type, size, make—we can service your electric motors perfectly, economically.

2—Scuttling of "Merrimack" fails, 1862.
3—Jefferson Davis born, 1810.

the shade of yon oak tree and I will stand on the soil of Texas and speak—and I have a right to speak there for my blood has bathed that soil."

There were wild cheers and almost everybody followed him and he made a great speech such as only Old Sam could make.

A dice game with the highest stake possible—a human life—is part of the history of Texas.

Nine men captured by the Spaniards in the Philip Nolan expedition were blindfolded and each rolled the dice. The one rolling the lowest was to be put to death as punishment for the invasion of Texas. Ephriam Blackburn rolled a 3 and 1 and he lost his life.

The Answers

- 6,400.
- Twelve.
- Nellie Tayloe Ross, now Director of the U. S. Mint.
- From Rudolph Diesel, late German engineer inventor of the oil-burning engine.
- Columbia River.
- Former Premier of Poland, now in exile.
- Nicaragua.
- Virginia—8 Presidents of the U. S. were born there.
- About 3,500,000.
- Payment for work not done.

HAS HIS PICK

Mrs. M. W. writes: "A doctor who recently located in our street has three handsome children. The other day I heard my neighbor's little girl say to her playmate, 'Those pretty children over there are the doctors.'"

"Yes, I know," said the other little girl, "he brings lots of babies and he keeps the best for himself."

HOLLYWOOD INFLUENCE

The Manchester Guardian vouches for this: A teacher in an infant school at Old Trafford admonished her tiny pupil, a movie fan. "Now, don't let me have to tell you again."

"O. K., Baby," was the child's reply.

PERTINENT QUESTION

"A fool and his money are soon parted."
"Yes? Who got yours?"

THE AMERICAN WAY

Bad Artist + Bad Subject = Sad Picture

Fairview Breezes

A young visiting preacher from Wayland College conducted the services Sunday morning.

The S. P. Sharpes family left for Atlanta Saturday morning. They expect to locate somewhere near there.

Mrs. Yada and LaVera Adams visited in the home of their parents, Mr. and Mrs. P. G. Anderson.

Mrs. J. W. Wesley visited Sunday with Mr. and Mrs. Fred Hart in Happy.

We received about one-half inch of rain last Thursday afternoon.

Mrs. Boyla Shipman and Shellie and Boyla's sister visited in the J. W. Wesley home Saturday morning.

Tom Rogers and Mrs. Berma Bryan and Mr. and Mrs. G. E. Wesley visited the S. P. Sharpes family.

In the J. W. Wesley home Friday evening.

G. E. Wesley assisted with confirmation services at Wayside Sunday afternoon.

Mr. and Mrs. H. H. Shipman visited his mother Sunday, who is in the Plainview hospital with a shattered knee cap.

EPISCOPAL CHURCH SERVICES

Services every Sunday evening at 7:30 o'clock at the All Saints Episcopal Church with Rev. Henry Seaman presiding. Fellowship hour follows the services at the Little House of Fellowship. Communion services are held on the first Sunday of each month.

Authorized Dealers for New Home Sewing Machines, portable, console and desk models on floor. Western Auto.

Umbarger News

A large crowd attended the annual May Festival sponsored by St. Mary's Altar Society held in the Parish Hall in Umbarger. A chicken dinner was served from 12 o'clock to 2:30. Other attractions consisted of a bazaar, a doll rack, fish pond and potato post package department. A ball game followed between Nazareth and Umbarger. The score was 4 to 5 in favor of Nazareth.

Visitors from Canyon, Vega, St. Francis, Hereford, Nazareth and Amarillo as did many political candidates.

Mr. and Mrs. T. T. Palmore and children, Jerry and Mary Lois and Mr. Edwin Landers and Miss Joan Cooper visited in the home of Mr. and Mrs. L. A. Plachute. They were all from Memphis, Tennessee.

Mrs. Bill Martin and Mrs. Carl Hair spent Friday in Lubbock.

THOMPSON'S

Children Diseases Are Tragic and Are Totally Unnecessary

Austin: How many people do you know that still cling to the old-fashioned idea that the sooner children catch the so-called diseases of childhood, the better off they'll be?

Take whooping cough, for example. Isn't it ridiculous for children to have to suffer with it when it may be prevented by simple vaccination?

Whooping cough goes by the scientific name of pertussis. Regardless of what you call it, it still means violent, painful, wracking coughing that takes the breath and tears at the chest and throat walls.

Pertussis is prevalent among children everywhere. About 15 out of every 100 cases are in children under two. North America, from time to time, seems to have more than its fair share of cases.

Sometimes it's fatal, especially to very small children. About 85 out of every 100 whooping cough deaths are among two-year-olds and less. And, strangely enough, most deaths are among girls. In 1949 Texas had 46 whooping cough deaths. So far in 1950, an average of 323 cases have been reported every week.

Whooping cough is spread through droplet infection—that is, by breathing air contaminated by a sneeze or cough or an infected person. You can get it from using the personal things of an infected person, too. It is communicable from about 7 days after exposure until three weeks after the coughing starts.

The important thing about whoop-

ing cough is that vaccination may protect against it. It's the only thing that will. If an unvaccinated child gets the disease, he will thereafter have what is called a "definite and prolonged immunity." But the fact of the matter is that second attacks have been known to occur.

Vaccination of all pre-school children is the answer to control. "Booster" shots may be advisable within a year after the initial vaccination. Your family doctor will make that decision.

Mr. and Mrs. Walter McRae of Fredrick, Colorado, arrived at the Walter Graham ranch Monday and left Wednesday morning to accompany W. A. Graham on an extended trip to the Rocky Mountains and points west. Mr. Graham spent the winter on the Walter Graham ranch.

Mr. and Mrs. C. S. Devenport and Kathryn with Mrs. Pearl Bryant of Brownfield spent Saturday night and Sunday in Blackwell visiting with Mr. and Mrs. Everett Bryant and Mr. and Mrs. Peter Bryant.

Air Conditioners — all sizes, one room apt. to average size home. Western Auto.

Jack Bearden and his fiancée, Miss Ann Spencer, both of Pampa, visited in Canyon Sunday. They will be married June 3, in Pampa.

Mr. and Mrs. P. L. Pitt and family visited in Waco and Temple from Thursday through Monday.

Mrs. Leigh Bull of Long Beach, California, visited in the home of Mrs. Ray McReynolds, last week.

Highland News

Everyone is enjoying this nice summer weather. The showers we have had help keep the days cool.

It is Bible School time again. The Palo Duro Baptist church is conducting one beginning June 5. Every boy and girl in the community is invited to come. The school will last two weeks. We have two trained workers coming to help.

Mrs. Maureen Tingley and Gwen visited from Saturday until Wednesday with Mrs. L. E. Crook in Borger. Mrs. Crook brought them home and stayed for an over night visit.

Mrs. L. E. White, Jane and Mrs. Winston Evans were in Plainview Tuesday on business.

Mr. and Mrs. C. Oettinger from Amarillo were dinner guests in the T. T. Jarnigan home Sunday.

The T. C. Jones' daughter and family from Amarillo visited them over the week end.

A. M. Atchley left Monday to take H. H. Elam to the mountains.

Rev. White and Jane, Jean Tandy, Verna Kay McBroom and Mrs. Mrs. Winston Evans were in Plainview Monday for the graduation exercises of Wayland. Mrs. White was among the group that graduated.

G. T. and R. A. met with Mr. and Mrs. Winston Evans Wednesday evening. Those present were: Lee Mason, Butch Tandy, Dean Atchley, Jack T. Higgins, Paul Higgins, Donald Armstrong, Verna Kay McBroom, Jean Tandy, Jane White, Veda Cummings, Lorene Armstrong, Mary Lee Crawford, and Dorothy Cribbs.

Mr. and Mrs. Roy Lee Jones and Randy were Sunday dinner guests in the T. C. Jones home.

Mrs. Earl Cox's sister from Tulsa visited her several days last week.

Unless You Are Ashamed of Your Guests, Notify News

Many visitors in Canyon during the course of the year are not reported to The News. This is not a very courteous way to treat your guests.

Please notify The Canyon News when you have guests in your home. They will appreciate having their names printed in the local newspaper; your neighbors will appreciate seeing this news; and certainly you are not ashamed of the fact that they visited you.

Please call 41 when you have guests, or when you are making a trip.

Carlton E. Wertz, newly-elected President, Medical Society of New York: "The general practitioner is still the essential factor in the practice of medicine."

Ben H. Guill, first Republican elected to Congress from Texas in 1949: "I don't know anything about Washington, just barely know what direction it is from here."

Louis Johnson, Secretary of Defense: "We may stumble into the accident of war, but war is not on the horizon at the moment."

Gambling held uncontrollable even if it should be legalized.

Life Expectancy Up Twenty Years In Half Century

NEW YORK — Medical science has added 20 years to the average life span during the first half of the 20th century.

These are cold figures, but they tell a warm and important story of man's struggle for healthier and longer life.

To be sure, the story is not yet completed. Yet the performance during the first half of this century and the promise of the next 50 years make the ultimate result inevitable.

In 1900 the average life expectancy was 50. The death rate was 17.2 per 1,000. The population was 76 million.

Today the average life expectancy is about 70. The death rate is approximately 10 per 1,000. And the U. S. population is estimated at 150 million.

TB Death Rate Down

To show the progress medical science has made against a single disease it is only necessary to cite the statistics on tuberculosis.

In 1900 the death rate from tuberculosis per 100,000 of population in the U. S. was 194. In 1947 the rate was 33.5.

Tuberculosis was the leading cause of death in this country until 1909. By 1949 tuberculosis had fallen to seventh place.

Medical men are not miracle men. In fact, they shy away from use of the word "miracle" in connection with any of their deeds. But the discovery of penicillin—and the epoch of antibiotics that the discovery made possible—truly is a modern miracle that has given life to countless thousands. Probably penicillin is the most important contribution of medicine to the health of the 20th century man.

Penicillin is a chemotherapeutic agent. No other antimicrobial agent before it had such a powerful effect on so many different diseases. No other drug had ever before done so much for so many diseases.

But penicillin did even more. It helped to blaze a new trail in medicine: antibiotic, or antimicrobial, therapy. Many new and promising drugs, which like penicillin are members of the antibiotic family, have come along to make their contributions to human health. All were possible because of penicillin.

Cost Reduced

The contribution of the scientists, doctors and technicians is well known and has been told many times. Less well known but no less important has been the magnificent production achievements of our pharmaceutical houses and medical laboratories.

One of the original and largest producers of penicillin, Schenley Laboratories, Inc., typifies the service industry has rendered. Schenley made its first domestic shipment of penicillin in 1944, to a Massachusetts hospital. At that time low yields and high production costs necessitated a price of around \$7.50 per 100,000 units. Since then, the company has made 15 successive price reductions and sells its product at less than one thirty-fourth of the original price five years ago.

Mass production of penicillin has made it possible to ship the drug to hospitals, physicians and wholesale druggists in every part of the United States as well as to 62 foreign nations.

Notables, Friends Honor Casey's Ride to Glory

JACKSON — Casey Jones, the engineer who rode to glory in the wreck of the Cannonball express, was honored again on the 50th anniversary of that fatal run from Memphis to Canton, Miss.

His home town proclaimed "Casey Jones day" and the government issued a special three cent stamp in his memory.

The governor of Tennessee, notables, and just the plain folks of Jackson were on hand for the celebration.

His widow, Mrs. Janie Brady Jones, who still lives in Jackson, was there as were Casey's son and daughter — Charles B. Jones of Jackson, and Mrs. D. G. McKenzie of Mobile, Ala.

Sam Webb, the Negro fireman who rode with Casey, was there also. He jumped to safety just before the crash on April 30, 1900.

Old time railroaders were on hand to hear the song that immortalized Casey.

"All the switchmen knew by the engine's moan, that the man at the throttle was Casey Jones."

Inventor Attaches Gear Shift to Shoes for Hills

TARBES, FRANCE—Jean Brunet, 70, an inventive Frenchman, has announced he has come up with a gear shift for shoes to take the walk out of walking up a hill. The invention is attached to the shoe sole and adjusted to the angle of the hill. Thus the foot is kept horizontal at all times.

Brunet says for going down the other side just adjust the gadget in reverse and you have it. A special skid proof sole prevents slipping.

Secret Service Men Finally Nab Fugitive Counterfeit Expert

CHICAGO. — After a 12-year search of hotels, libraries, railroad stations and stores, U. S. secret service agents have arrested a counterfeit expert who allegedly made his money in the winter and spent it in the summer.

Agent Henry Anheier reported the arrest of Hugin Hedin, 57, a Swedish alien, on charges of making and possessing counterfeit money. He described Hedin as a "lone wolf" who had been trailed by agents working in relays until he was found in a two-room Chicago apartment with paper and plates for bank notes.

"I knew you'd get me sooner or later," agents quoted him.

Anheier said Hedin was convicted at Detroit in 1927 on a counterfeiting charge, served in prison until 1930, and in 1938 came to Chicago and was believed to have started making notes again.

Agents said the notes allegedly made by Hedin were difficult even for banks to detect.

Hedin was unmarried and worked alone, agents said. He never stayed long in one place. Agents who were trailing him sometimes sat beside him at libraries and watched him read books on metals and papers, but never could find him with evidence.

Last November, however, they discovered that he had invested in some real estate in Grayslake, Ill. When he wrote to a real-estate agent about delinquent payments, they closed in, following him to a hotel in St. Louis and finally to Chicago.

Anheier said Hedin was working on a plate for a \$5 note when agents entered his hideout, and that they found 10 other plates and paper for 100 notes in his rooms.

Family Radio May Soon Become Mosquito-Killer

NEW YORK. — The family radio soon may be used to kill mosquitoes—and not with commercials, either.

Just broadcast the song of the female mosquito, amplified a million times. Male mosquitoes, lured by the siren song, come running and are burned to a crisp on an electrical grille covering the loud-speaker of the radio.

Dr. Morton C. Kahn, associate professor of public health at Cornell university medical college, says that on a recent trip to Cuba he conducted an experiment in the center of a vast mosquito filled bog. The female voice, broadcast over giant loud-speakers, attracted every male mosquito within a one mile radius. They perished on a charged grille.

There's one little hitch, however. Females, probably being smarter, aren't drawn by the call of the male mosquito.

It's the female mosquito that causes humans all the trouble. (The male mosquito's beak is not strong enough to pierce the human skin.)

Man Without Any Arms Plays Bach on Piano

CHICAGO.—A man who had lost both arms played Bach and boogie-woogie on the piano in a motion picture, and surgeons applauded his performance.

Dr. Henry Kessler, West Orange, N. J., told the American Association of Railway Surgeons the performance by an unnamed patient shows what can be accomplished when a person is taught properly to use artificial hands.

The doctor said he thought the man "was joking" when he first came to his rehabilitation institute in New Jersey and announced he wanted to play the piano.

Kessler said that after the man learned routine dexterity, such as tying a shoe, the amputee was fitted with two special pairs of metal fingers which he learned to spread to cover a wide range of notes.

The doctor said it was not enough to give a man an artificial appliance and turn him loose.

"He must be taught how to use it, after being psychologically prepared," Dr. Kessler said.

Homing Pigeon Homes Only to Young Owner

STANTON - BY - BRIDGE, ENGLAND.—Ivy Aucote, 11, has a homing pigeon which is different.

Instead of homing to his pigeon cote as a homing pigeon should, he homes to Ivy—wherever she is.

The pigeon, named Joey, is six months old. He was let out of his cage to exercise about two hours after Ivy had left for school.

He whizzed off and joined her in the classroom, two and one-half miles away in Melbourne. He since has repeated the stunt twice. He also finds Ivy when she's stopping in Melbourne.

E. L. Hunt, a member of the council of Great Britain's national homing union, told newsmen:

"One or two similar cases have been heard of before. In some birds the ability to 'home' in this fashion is developed to an extraordinary degree and is unexplainable."

Honor Son With Birthday Party

First row, left to right: Eddie Leak, John Robert Wheelock, Jean Westfall, Floyd Rogers, Leonard Miller, James Paul Funston. Second row, Buzzy Barnhill, Larry Byars, Danny Welch, Weldon Prichard, Joe Lindsey, and David Lee Hill.

Mr. and Mrs. R. D. Wheelock honored their son, John Robert, with a birthday party on his tenth birthday, May 19. After several yard games were played, John Robert played three piano selections. They were "Minuet in G" by Beethoven, "As the Dance Goes On" by P. Lichner, and "Off For a Trip," by James Milton. Birthday cake and ice cream was served to the guests.

LINGERING GOLDEN AGE

"What do you think are the most interesting years of a woman's life?"

"The first two or three years that she is twenty-one."

Texas Seeks Zones For Hunters With Higher Bird Bag

Austin: Helping arrange shooting dates so that migratory waterfowl hunters in the sprawling state of Texas may get a fair break this fall has been undertaken by the Game, Fish and Oyster Commission. In the matter of when to shoot ducks and

geese, what time of day to begin and quit and the daily bag and possession limit total, the Commission functions merely in an advisory capacity. This is because the final decision is made by the United States Fish and Wildlife Service. The Commission, through action at its recent meeting at Pampa, already has asked the Federal authorities to cut Texas into two zones so that the season in the Panhandle and extreme West Texas might run concurrent with the surrounding

areas of Oklahoma and New Mexico, thus providing for an earlier shooting season than the state at large. Later open season dates are preferable in the more southerly sections of Texas since the waterfowl reach those areas later. For the main part of the state, the Commission has suggested that the split season plan of last fall be replaced by a straight shooting period beginning November 10. In 1949, Texas duck and goose gunners hunted from November 4 to November 21 and then from December 21 to January 7.

Bag limits also would be changed to provide for eight birds a day or the same number in possession. Game Department field men have observed some tendency by hunters to kill more than the bag limit when the daily limit is only four birds leaving the less desirable species to waste where they fall. Thus, waste would be eliminated through a higher daily limit since the proposed possession limit would be unchanged. Similar problems involve the suggested zoning plan to accommodate the Panhandle sportsmen. Texas, although as large as two or three ordinary states, has never been zoned for waterfowl hunting. Perhaps one reason is that, with the season in the northern extremity of the state opened two or three weeks earlier than that in the state at large, hunters from the southern area would move in to share in the earlier season, and the hunters in the northern areas would legally travel southward to enjoy a prolonged gunning period within their own state. The Commission may recommend and suggest but the final decision is up to the Federal authorities.

ENGINEERS

The nation faces a serious shortage of engineers, starting in 1954, unless more college students train for the profession, according to the Office of Education, which points out that there probably will be fewer engineering graduates in 1952 than were actually placed in jobs in 1949.

Richard L. Rosenthal, president, public utility company: "Orders are neither Republican or Democratic. Demand for goods is not a political theory, calling for belief or disbelief."

Ross E. Moore, official, Office of Foreign Agricultural Relations: "For the first time since the Magul's, women are beginning to be a farce in Aria."

Begum Liaquat Ali Khan, wife of Pakistan's Prime Minister: "There is a lot to be said for arranged marriages. I have seen so many love marriages go bust."

Willie Turnesa, former U. S. and British amateur golf champion: "The most fascinating thing about golf is that you don't know where the next ball is going."

Dr. John Z. Bowers, Atomic Energy Commission medical researcher: "At this date, atomic energy has saved more lives than it has destroyed."

William H. Burton, Harvard professor: "Teach the world as it is and why. The school is not a school if it avoids controversial issues."

Remote Ranch Is 'Whodunit' Fiction Plant

TEMECULA, CALIF. — The remote, wilderness ranch of Earle Stanley Gardner, famed creator of fiction's lawyer-detective Perry Mason, is literally a fiction factory where Gardner and a battery of secretaries turn out whodunits almost as fast as avid fans can consume them.

The 60-year old Gardner is reputed by Publisher's Survey to be the world's most widely-read author. His books have sold over 40 million copies, exclusive of translations in 13 languages. He has written 65 novels and 63 of them have been published. Since he usually has at least two in process, these figures are subject to change overnight.

Gardner's Rancho del Paisano sprawls at the foot of a mountain range, its dozen buildings shaded by mountain oaks. In the distance, snow peaks arise from the vast, semi-arid expanse of Riverside county's cattle country.

The nearest telephone is in the hamlet of Temecula, eight miles away. Telegrams wind up at Elsinore, 27 miles distant, to be relayed by phone to a tiny roadside cafe in Temecula. A waitress takes them down with a pencil and ruled tablet and an Indian runs them out to the Gardner ranch—if an Indian happens to be around.

Center of Activity

The mail, only direct means of communication, arrives at 11 a.m. and goes out at 1 p.m. Despite its sleepy setting, the ranch is a center of furious activity all day long, but in this two hour period the pace really becomes frantic. Guests are politely shunted aside while Gardner dictates at top speed those replies that can't wait.

So heavy is his correspondence that the little Temecula post office has been advanced two grades in the official postal hierarchy.

Gardner is a sturdy, hearty man of intense energy and remarkable mental agility. He can, and does, work on two novels, a radio script, a couple of short stories, an article and "The Court of Last Resort" all in the same day. The "court" is a current project in which Gardner and associated criminologists investigate cases of men convicted on circumstantial or incomplete evidence. Three men have been released from life imprisonment as a result of the "court" activity.

Was Lawyer 20 Years

For nearly 20 years Gardner was an attorney in Oxnard and Ventura, Calif., until practicing law by day and writing by night became too arduous. He sold the first two Perry Mason novels, "The Case of the Velvet Claws" and "The Case of the Sultry Girl," in 1933. The first was written in three and a half days. Thereafter new Perry Masons issued steadily, at least one a year for several years. Later he averaged four a year. Besides the Mason stories, Gardner writes the "D.A." series and, under the name of A. A. Fair, the Bertha Cool and Donald Lam mysteries.

Co-Eds Are Given Hint To Let Men Do Chasing

MADISON, WIS.—A visiting sociology professor gave University of Wisconsin students some pointers for choosing husbands and wives. The speaker was Dr. Judson Landis, sociology professor at Michigan State college. He spoke in the "major in marriage" lecture series sponsored by the YMCA and YWCA.

Landis said that "it" was not nearly so important a criterion as most students supposed, but he admitted that he couldn't define "it." "You all know what I mean," he said.

The professor advised the coeds to let the man do the pursuing, and told the men students to "be careful of career women."

He suggested that parental approval, similarity of religion and outlook, adjustability and emotional maturity were sound basis for happy marriages.

Chamber of Commerce Man Has Own 'Leg' Problem

REYNOSA, MEXICO. — Roy Rendon probably worries more about U.S. women's legs than any man in Mexico.

Roy personally thinks they're all right but officially he's against them.

He's the chamber of commerce manager of this lusty Mexican border town, through which yearly pass thousands of American women tourists.

The trouble comes because the Yankee girls like to let their hair down and wear shorts when they go into the sunny land of manana. In Reynosa, women in shorts don't attract any more attention than in Syracuse, N. Y. But in interior Mexico—for instance Monterrey—it's different.

Nice women don't wear shorts in Monterrey. Only the painted ones would think of it and they wouldn't dare.

But U. S. girls saunter the streets of Monterrey with lots of their anatomy showing.

U. S. note asks Soviet to return two ice-breakers by June 30.

Atom-Powered Plane Of Supersonic Speeds Said in Production

CLEVELAND, OHIO. — Development of an atomic-powered airplane, able to circle the globe at supersonic speeds, is in progress and a date for its test flight is in the offing.

Andrew Alitinsky, chief engineer of the Oak Ridge, Tenn., atomic center has said that work on the plane is on a definite timetable.

The plane will be of larger dimensions than current bombers, it was said, but will resemble present supersonic models in appearance.

Speaking before the institute of aeronautical sciences, the 36-year old scientist said the main obstacle to overcome will be the shielding against lethal nuclear radiation within weight limits imposed by aircraft. However, he said the tremendous weight of gasoline in conventional aircraft affords a good margin for the shielding job, since fuel weight will be negligible in an atomic-powered plane.

"A pound of uranium has about two million times as much energy as a pound of gasoline," Alitinsky said, "and that's what excites scientists, since present supersonic planes use fuel so fast and can carry so little that the X-1 rocket craft, for example, can only fly three minutes."

Kalitinsky said there still remain many complicated problems in the application of atomic energy to aircraft, but "these problems do not look insurmountable."

The development of the atomic-powered aircraft is a joint undertaking of the atomic energy commission, the national advisory committee for aeronautics and the air force and navy.

Angered Burglar Sets Fire When Safe Empty

CINCINNATI.—A burglar, angered because he couldn't crack a safe in the Queen City Laundry here, set fire to the place and left a note telling why.

The note, found in the laundry office, said:

"Next time leave some money around. See what you had to pay for not having money handy for a poor feller. Your poor safe—So sorry. Haw, haw, haw."

Fire Marshal Joseph Devine said kerosene had been spilled over office furniture to start the fire. A watchman in a next-door warehouse saw the blaze, however, and damage was limited to \$200.

Atom Bombing Survivors Appear Now Out of Danger

WASHINGTON.—After more than five years, survivors of the atomic bombings of Hiroshima and Nagasaki appear to be out of danger. Very few of the dreaded delayed effects have appeared, according to reports to the atomic energy commission.

A thorough study of the blood picture of the survivors was made last year. There was a slight decrease from normal in both red blood cells and various types of white cells, but this was not sufficient to affect general health. Almost the same picture obtained in the Japanese city of Kure, which suffered no atomic bombardment.

A good many babies have been born in both A-bombed cities since 1945. There were predictions that children of the bomb victims would show a high percentage of deformity. This has not been the case.

There was only one significant positive finding reported by a team of doctors headed by Dr. David Cogan of Harvard university. They detected 10 cases of cataracts of the eyes which were undoubtedly due to radiation. Accepting those examined as a fair sample, it is predicted that about 6 per cent of all those within 1,000 yards of the center of the explosion eventually will develop such cataracts, which lead to blindness.

"Otherwise," says the report, "those surviving the acute effects of radiation can expect a reasonably normal life."

It is stressed, however, that it may still be too early to make this prediction with complete assurance. There is reason to suppose that there will be a somewhat greater amount of leukemia, the incurable "blood cancer," as the years go by.

Russia Named Beneficiary In Will of Late New Yorker

NEW YORK.—New Yorker Laird Shields Goldsborough has bequeathed "certain articles of special rarity" to the Russian government. Shields, a former foreign affairs editor of Time magazine, jumped or fell to his death from his office on the ninth floor of 9 Rockefeller plaza.

In his will, he named the Russian government an alternative legatee to the contents of a safe deposit box, described only as "certain articles of special rarity."

The Elizabethan club of Yale university, the Metropolitan museum of art, the British museum in London and the Hermitage museum of Leningrad, in turn, have the chance to take the articles.

If none accepts, Goldsborough's will directed that "said articles be given to the de facto government for the time being in Russia, to have, and to hold to its own use and benefit absolutely and forever."

New bombs will make war unthinkable, Lawrence says.

How to make friends with a clock!

Every time you look at a clock does it reproach you for not laying aside something for the future?

Does its scowling face warn you that it's later than you think?

If that's the way a clock looks to you, it's high time you signed up for some United States Savings Bonds—under your firm's Payroll Savings Plan or your bank's Bond-A-Month Plan.

Soon as you do that, your clock will start to grin at you every time you give it a look. And each cheery tick will be a bright reminder that you're getting nearer your goal of financial independence.

And in the decade of progress that most economists say is just ahead, financial independence is going to be more important than ever before.

With a nice nest egg of U. S. Savings Bonds, you'll have freedom of action. You'll be able to take advantage of opportunities as they come along—to make the most of every situation.

Remember, every \$3 you put into U. S. Savings Bonds becomes \$4 in ten years. Better start growing money now—before that clock scowls at you again.

SAVE FOR YOUR INDEPENDENCE BUY U.S. SAVINGS BONDS

FROM THE HEART OF A SOUL

A clean life is more to be desired than gold . . . and the consolation a lucky possessor has in knowing that he or she is privileged to reap daily from its huge storehouse of self-created blessings is unspeakable. The testimony given here is not an occasion of pride nor of idle show but may these facts be influential in your scheme of living . . . may they challenge you to find yourself in time to avoid embarrassment.

A good home is unquestionably one of the greatest privileges of any individual and its influence is evidenced through many generations. Parents who spend hours teaching and leading their youngsters to a better understanding of the things beautiful and most of all . . . how to live, shall not have spent life nor time in vain.

THE curse of drink and its companionate sins is without question the greatest evil of this generation. It knows no bounds, nationality nor faith. It prays upon those who are weak enough to accept what it offers and prostitutes without discrimination. A clean life cannot be hidden. Its smile is radiant; its influence profound; never looks dissipated and always is on the alert. Your church can help you to live clean. Attend regularly and give systematically to her program.

Double Ring Service Read for Jerry Ann Foster and Frank L. Stallings, Jr., in Impressive Service

MRS. FRANK L. STALLINGS, JR.

White gladioli and candelabra holding white tapers formed the background for the impressive candlelight services in which Jerry Ann Foster, daughter of Mr. and Mrs. D. M. Foster of Canyon, became the bride of Frank L. Stallings, Jr., son of Mr. and Mrs. Frank L. Stallings, Sr., of Pampa.

Rev. Hubert Thomson, pastor, read the double ring service in the First Methodist Church at 8:00 o'clock

Tuesday evening, May 30.

Mrs. Tom E. Knighton, organist played "Clair de Lune" by Debussy and "Traumeri" by Schuman as pre-nuptial selections. She played "Poems" by Fabich while Don Stallings, brother of the bridegroom, lighted the candles and accompanied Jim Cherry who sang "Because" by D. Harlelot and "O Promise Me." "The Lord's Prayer" by Malotte formed a musical background for

the wedding rites and benediction. The traditional wedding marches were used for the processional and recessional.

Miss Laura Davis, maid of honor, wore orchid marquisette made with fitted bodice and full skirt falling over hoops. The low neckline was framed with a ruffle caught up with flowers. She carried a contrasting colonial nosegay. Her headdress was a bandeau of flowers.

Bridesmaid's dresses were designed identical to the maid of honor's. Miss Katherine Wright wore aqua; Miss Dorothy McReynolds, orchid; Mrs. Gladys Thomas, blue; and Mrs. Frank Heare of Miami, yellow.

Frank L. Stallings, Sr., father of the bridegroom was his son's best man. Don Turner, Tom Knighton, Don Wright and Dan Stallings were groomsmen. Manus Read Foster, brother of the bride, and Louis Stallings, brother of the bridegroom were ushers.

Master Vincent Johnson carried the rings on a satin pillow.

Given in marriage by her father, the diminutive bride was a picture of loveliness in her gown of white sheer nylon marquisette with panels of Chantilly lace cascading down the full skirt and into the train which terminated with a wide sweep. A wide ruffle of marquisette circled the skirt and train. The fitted bodice was joined to the yoke by a band of lace which was framed with a ruffle. Her fingertip veil of illusion fell from a halo of seed pearls. She carried a cascade bouquet of feather carnations and gardenias on a Bible which came from Jerusalem and be-

longs to her grandmother, Mrs. Emma Foster. Her veil was borrowed from her cousin, Mrs. Lawrence Keaton.

For her daughter's wedding, Mrs. Foster chose a periwinkle blue lace and taffeta with a headdress of matching maline and a corsage of white carnations. Mrs. Stallings, mother of the bridegroom, wore a mauve and rose iridescent crepe gown with headdress of matching maline and a corsage of white carnations.

At the reception held in Fellowship Hall, following the ceremony, the bride's table was laid with a satin cloth and centered with the bride's bouquet flanked by crystal candelabra. Mrs. Don Wright and Mrs. E. L. Prichard served the three tiered wedding cake which was decorated with rosebuds and surmounted by a miniature bride and groom. Mrs. Lawrence Keaton, Mrs. Raymond Johnson and Miss Mattie Foster presided at the crystal punch bowl.

Miss Sarah Jane Martin presided at the guest book. Other members of the house party were Miss Betty Ross Craig, Miss Teddy Howell, Mrs. Ray McReynolds, Mrs. Alfred Bellah, Mrs. W. E. Miller, Mrs. M. E. Cleavinger, Jr., of Dimmitt, Mrs. T. H. Knighton, Mrs. Stacy Howell, Mrs. Ross Craig, and Mrs. Lorenzo Wirt.

For traveling the bride wore a pink gabardine suite with blue and white accessories and a white gardenia corsage. After a short trip the couple will be at home at 2416 Fifth Avenue, Canyon.

Mrs. Stallings was graduated from Canyon High School and is now a sophomore at West Texas State. While in high school she was a member of the A cappella choir, F. H. A., Spanish Club, Annual Staff and participated in other school activities.

Mr. Stallings graduated from Pampa High School; took his A. B. degree at West Texas State on May 23. While in West Texas State he was editor of The Prairie for two terms, president of Mu Kappa Delta; member of Alpha Phi Omega and of Alpha Sigma Xi fraternity. He is an accomplished linotype operator and is now employed at the Times in Amarillo.

Pre-nuptial courtesies extended the bride included a kitchen shower with Miss Dorothy McReynolds and Mrs. Frank Heare hostesses and classmates and girl friends of the bride as guests. Mrs. Lorenzo Wirt was hostess to a linen shower with members of the Lou Hester Club, O. E. S. Past-matrons Club, as guests. A tea shower was given in the home of Mrs. Hud Prichard with Mrs. J. J. Walker, Mrs. Frank Hicks, Mrs. Doug Louder, Mrs. Ross Craig, Mrs. W. E. Miller, Mrs. M. E. Cleavinger, Jr., and Mrs. Alfred Bellah as co-hostesses. Approximately 75 guests called during the afternoon. The rehearsal dinner was given in the home of Mr. and Mrs. Ray McReynolds on May 29.

MRS. MILLER ENTERTAINS SUNNY HILL H. D. CLUB

Mrs. E. W. Miller was hostess to the Sunny Hill Home Demonstration Club on Thursday, May 25.

The meeting was opened with the song, "Home On The Range," and roll call was answered by each member telling her favorite color. Mrs. R. B. Gist, Jr., reported on the tour that is being planned to different homes in the community.

The meeting was turned over to Miss Lou Ella Patterson, who gave a color scheme demonstration. After the refreshments were served the following members enjoyed music and singing.

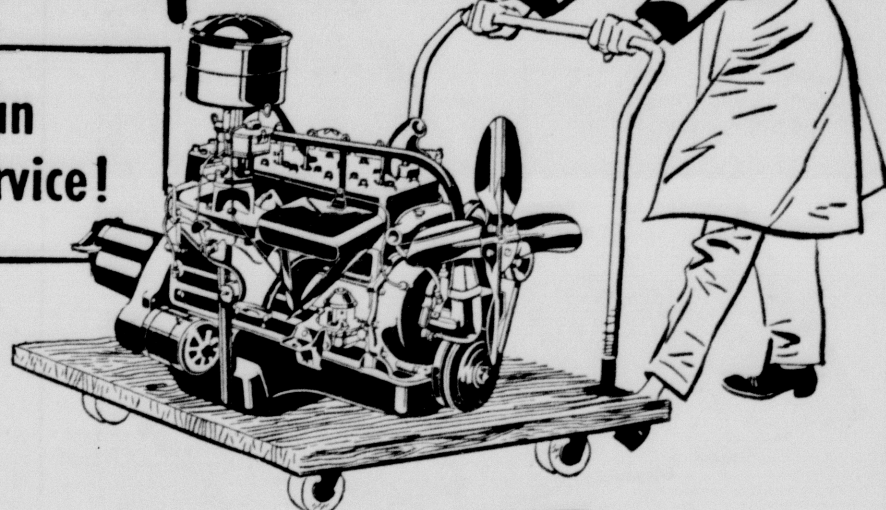

Miss Lou Ella Patterson, Mrs. Everett Culp, Mrs. Lester Knox, Mrs. Everett Evans, Mrs. M. R. Miller, Mrs. R. B. Gist, Jr., Mrs. Orva Henry, Mrs. E. W. Miller, Mrs. Loyd Brutman, Betty Miller, and Lana and Betty Henry.

Mrs. Henry Cloud First Indian Named Mother of Year

NEW YORK.—Mrs. Henry Roe Cloud, 59, of West Linn, Ore., has been named "American Mother of 1950."

Mother of four daughters, Mrs. Cloud is the first Indian ever selected for the honor. She was born on White Earth Indian reservation at Foston, Minn.

She was chosen by the American mother committee from 52 candidates, one from each of the states, the District of Columbia, Alaska, Hawaii, and Puerto Rico.

The committee said her chief qualifications were her success as a mother, as shown by the character and achievements of her children and her own strong religious and spiritual honesty.

Mrs. Roe was graduated from Hampton, Va., Institute and taught school among the Blackfeet Indians in Montana before her marriage. Her late husband was the first Indian ever graduated from Yale university.

He founded the American Indian Institute for Boys at Wichita, Kas., where his four daughters were born.

Among her activities, Mrs. Cloud is chairman of the Oregon Federation of Women's clubs and in 1940 attended the White House conference on children and youth.

Her four daughters went to school in different sections of the country and each won a scholarship to help finance their educations.

The eldest daughter, Mrs. Edward Hughes, 32, was the first Indian girl to be graduated from Wellesley college. Mrs. Robert North, 31, went to Vassar college and Ohio university. Mrs. Raleigh Butterfield, 27, also is a Vassar graduate. Mrs. Leo Freed, 29, attended Stanford university.

Waistline of American Male Larger Since War

ROCHESTER — You are getting bigger around the waist—that is, if you are a man, according to a prominent belt manufacturer.

According to Ray Hickok, 74 per cent of the belts sold before the war were size 34 or smaller. By 1949, however, only 50 per cent were in the small size.

From 1939 to 1949, the number of size 38 belts (in 1,000 lots of standard sizes) rose from 66 to 127. Size 40 rose from 33 to 86 a thousand. Size 42 went up from 18 to 59 and 44 inches from 9 to 35.

Science Still Puzzled By Brain's Spirituality

BALTIMORE, MD.—One of the world's leading brain surgeons says that scientists must still visualize a "spiritual element" in man which controls his complicated brain mechanism.

The statement was made by Dr. Wilder Penfield, professor of neurology at McGill university and director of the Montreal Institute of Neurosurgery, in a lecture on the "geography" of the brain.

Modern neurology envisages a master center—"like a central switchboard or headquarters"—within the brain to co-ordinate sensory and motor impulses.

The control center, Dr. Penfield told Johns Hopkins hospital medical men, is "the seat of consciousness." But all this still leaves unanswered the question of the human "mind," he acknowledged.

He observed that the "physicist may turn his attention to the problem, may refer to feed back mechanisms and coin a new term, cybernetics, but he is in no better position than the physiologist, or the psychologist—or even a surgeon, for that matter—to explain how nerve action becomes thought or how thought is translated into the nerve action we call voluntary."

The surgeon continued: "What is the real relationship of this mechanism to the mind?"

"Perhaps we will always be forced to visualize a spiritual element of different essence, a spiritual element that is capable of controlling the mechanism."

Air Stewardess' Mother Wanted Long-Trip Hop

CHICAGO.—Ever since Andrew (Kit) Higgins became an air line stewardess, she's been trying to persuade her mother to accompany her on a flight to Moline, Ill. But her mother, Mrs. Colette Wylie of Chicago, turned down the invitations.

"When I make my first flight it won't be a short hop," she vowed. "I'll fly far or not at all."

Mrs. Wylie wasn't kidding. She told Kit she was planning an air trip.

"Where?" asked Kit. "To Australia."

"But, mom, that's 10,000 miles." "Not quite," corrected Mrs. Wylie. "Only 9,500 to Sydney."

Mrs. Wylie took a month off from her job and explained for "down under" to visit her parents. She returned to Chicago, after logging 20,000 miles of air travel.

"Now I'm ready for that flight to Moline any time," she told her daughter.

Russians walk out of World Red Cross meeting.

Coach Gus Miller Announces Big Basketball Schedule for Buffaloes With Leading Teams of the Nation

Dick Duenkel, nationally famous basketball statistician has placed West Texas State's Buffalo cagers as third ranking team in Texas for 1951.

Duenkel rated 33 teams in Texas, placing Baylor first, Southern Methodist second and West Texas State third.

According to Duenkel's ratings, the Buffs will play five teams holding first place ratings in their respective states next season. They are Oklahoma A&M, Western Kentucky, Marshall of Virginia, New Mexico A&M and Arizona University.

They will also play Western Illinois which ranks seventh, and Pepperdine which will rank ninth in California.

A 21-game schedule with the possibility of two additional tilts which are under consideration at the present time. The Buffs also will play one tournament but which one is undecided.

THE SCHEDULE

Dec. 4: Oklahoma A&M at Canyon. (This game will open the new West Texas State Field House).

Dec. 7: (date tentative) Western Illinois at Canyon.

Dec. 12: Western Kentucky at Bowling Green.

Dec. 14-15: Doubleheader at Huntington, West Virginia with WT, Pepperdine, Marshall and Murray.

Dec. 29-30: Tournament.

Jan. 3: New Mexico A&M at Canyon.

Walter Rogers Gives Praise to Supporters In Special Election

To the Voters of the 18th Congressional District of Texas:

May I express my deep thanks and gratitude for the many voters over the District who expressed their confidence in me by their vote in the Special Election of May 6th. I was indeed gratified by the large plurality that I received in my home county where I am daily associated with the people. I tried my best to see as many of the voters over the District as I could personally, but the tremendous size of the District was a handicap considering the short time for that purpose.

May I also express my appreciation to the other candidates for the open and democratic manner in which the entire campaign was conducted.

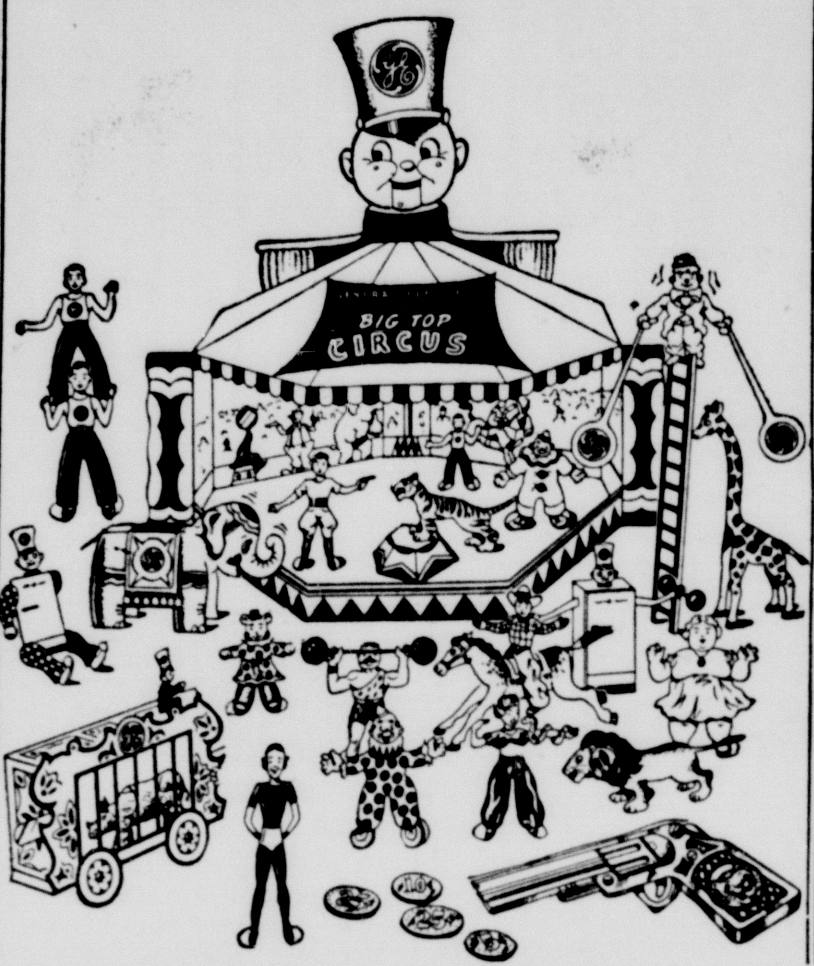

Although the campaign was a very strenuous one, I have continued to assure my many friends over the Panhandle that "the fight is just begun." I shall never cease in my efforts to have honest, economical Government on a local, self-governing basis without outside interference. I am still the old school Texas Democrat that I have been all of my life, a free citizen and wholly unobligated except to God and Country. I am still opposed to socialistic trends in Government and in infiltration of our departments and bureaus by communistic elements. We must purge our Government agencies, both high and low, of this infiltration. We, the honest, free-thinking Texas Democrats, can do this without delay, but we must join together in a common cause and stay on the defensive. The true Democratic principles as laid down by Jefferson and his followers must be perpetuated in this District, and the salvation of those principles depends upon the true Democrats rising to the occasion. Idealistic theories of temporary leadership of any party do not change the basic principles upon which the party was founded. The time to fight is now! I respectfully request the voters of this District to name me Democratic Nominee by a majority vote in the July 22nd primaries, and that

WALTER ROGERS.

FARM VALUES

The national average value of farm real estate was one per cent higher in March than last November, according to the Agriculture Department. The national average value in March was put at 169 per cent of the 1912-24 average, or 5 per cent less than the November, 1948, record high mark of 177 per cent. Florida farms showed the largest increase—4 per cent—since last November, principally because of the higher prices for citrus fruits.

"TRUE VOTE"

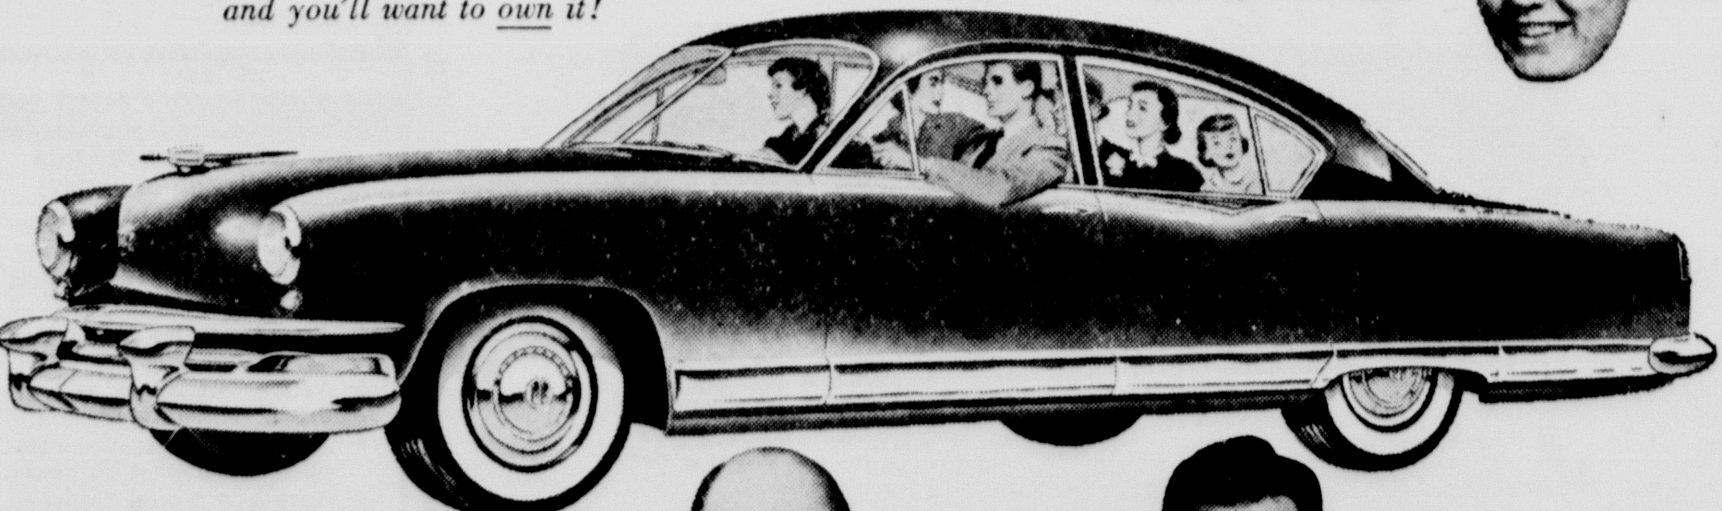

At least 66,000,000 persons should vote in next November's elections if there is to be a "true sampling" of public opinion, according to the National Democratic Committee. The committee based its figures on Census Bureau estimates that there will be 97,230,000 potential voters on November 1.

PRESIDENTIAL TRAVEL

President Truman can lay claim to the all-time presidential miles-per-month championship. His 7,000-mile rail swing to the Pacific Northwest, will bring the White House travel crown to the President. After this try, President Truman will have averaged 2,474 miles of travel a month for his five years, one month in the White House, compared with the travel record of Franklin D. Roosevelt, who averaged 2,442.5 miles a month for his twelve years, one month in office. William Howard Taft, who averaged 2,386 miles a month over his four year tenure, comes third.

General Groves says atomic energy may bring nationalizing.

VIKING ROCKET

A Navy Viking rocket, with which scientists are probing the upper atmosphere and the mysteries of cosmic rays, has been fired to an altitude of 106.4 miles to set a record for an American-built, single-rocket. It fell short by eight miles of the altitude reached by a German V-2, fired in 1946 at the White Sands Proving Ground, in New Mexico.

"Senator Kenneth S. Wherry, Nebraska Republican, says 1950 will be the crucial year in which 'the grand jury of the people will decide on whether America is to go farther down the road to spendthrift socialism and national bankruptcy or call a halt and get onto freedom highway.' The record shows that choice cannot safely be left to Washington's bureaucrats and politicians. The job of stopping the spenders... is a job for the average citizen."—Stanley High in Reader's Digest.

Brien MacMahon, U. S. Senator from Connecticut: "Fear is on the offensive and winning victories for the forces of evil."

T. A. BLACK

Ben Guill Reports To the People of the Panhandle

Congress took a recess on Thursday, May 25, for five days, to allow the Senate to catch up with it. The Senate has been bogged down with the very important business of beating the proposed F. E. P. C. legislation and, since it is important that the work of both Houses be synchronized, a five-day break was called.

I welcomed the recess because it will allow me to fly back to the Panhandle and confer with the folks back home on the Canadian River Dam. We have managed to get the project approved by the Subcommittee and the Committee in the Senate, but it looks as if certain amendments will be added which would turn the dam over to the people of the Panhandle after a reasonable time, instead of having it operated entirely and forever by the Federal Government. It is very important that these amendments be considered carefully before they are accepted. However, the Senate leaders say that, unless the amendments are approved by the Dam committee in the Panhandle, the project will never receive approval. If necessary, I hope to bring one or

two of the key Senators down to the Panhandle as my guests to discuss the dam on our home grounds. The Panhandle needs the dam and we have to get it as soon as possible. It is important not to make any mistakes at this point.

Another reason for my brief trip home is to interview personally the boys from the Eighteenth District who want to go to West Point. A Congressman has a certain number of appointments to the Naval and Military Academies each year. (I have three for West Point this year.) The Army is very anxious to have the quota filled, and it's important that exactly the right boys be chosen. Charlie Gibson, of Amarillo, the District Commander of the American Legion, has been very helpful in making recommendations. So has the V. F. W., and, of course, Cal Farley performed a great service when he recommended Earl Leroy Smith, a graduate of Boy's Ranch and currently a student at Texas A. and M.

I have already appointed Earl to West Point and I feel certain he will do well. He will be a credit to Boy's Ranch.

The first ten days in Washington were busy. Since the Panhandle had been unrepresented in Washington for six weeks during the election, there was a great deal of back work to catch up on. Then, of course, there are the letters which must go out, besides the routine jobs of a Congressman. I have retained Judge Worley's staff and they are loyal, hard-working girls who have been performing yeoman service in getting the job done. I have also brought Mrs. Lillian Kelley, of Pampa, one of my former students, up as a member of my staff.

This business of being a Congressman can be very complicated. The other day I wanted to stick my oar in during a debate on the floor, so I was advised to use the device of asking permission of the Chair "to strike out the last word." I didn't quite know what that meant, so I looked it up in "Cannon's Procedure in the House of Representatives," the Congressman's Bible. It described the process as a "pro forma amendment, not in order as amendment of amendment as it is an amendment in the third degree." I didn't find the definition much help, but the technique did allow me to have my say on the floor of the House.

Incidentally, the House meets in the Capitol, which is about a quarter of a mile from the House Office Building and connected by an underground subway. One day last week there were about five quorum calls at a time when I was conferring in my office on several aspects of the Canadian River Dam so I spent the afternoon on the run, back and forth. I was mighty glad I used to run the mile at West Texas State College. I hadn't realized that a Congressman gets so much exercise in the performance of his duties.

The Senate, incidentally, has a little electric car, which looks like a scenic railway gondola, on which the Senators can travel back and forth from their office building to the Chamber.

I would like to say here that the Texas Delegation of Congressmen has done everything possible to help me. Although I am the only Republican among twenty-one Democrats, they have been cordial and generous with assistance. As one Congressman said: "Party lines don't mean as much up here as people think. After all, we're all Americans and all Texans together and that's the only thing that counts." You will be glad to learn that the Texas Congressmen are generally considered to be the most able delegation on Capitol Hill.

NOTE ON SCIENCE

Science is marvelous in its uneven way, it can tell from sea-shells what the weather was 6,000,000 years ago, but forgets to wear its rubbers to the office.

COMING CANDIDATES

The candidate of the future will perhaps declare that he started life as a pedestrian.

In the name of all who hope to know, cling close to what you know already.—Phillips Brooks.

Civilization and character are murdered in the tenements for the lack of homes.—Riis.

Help Keep Canyon Clean!

Service Gives German Women Will to Live

NUREMBERG, GERMANY.—Hundreds of German women, exhausted and depressed by 10 years of war, poverty and uncertainty have found strength to go on living with the help of the Bavarian Mothers Service.

This 15-year-old independent voluntary agency of the Evangelical church of Germany, headed by Dr. Antonie Nopitsch, is helping about 4,000 women a year to find themselves again. It operates seven "rest homes" where a woman can have a two-week spiritual retreat from the struggle against poverty and trouble.

One of the rest homes and also a Bible school and the headquarters of the service, overlooks the green farmlands of Stein, near here. There a mother can find a soft bed, quietness, spiritual help and friends. It is a complete change of surroundings.

Unable to Sleep
Some mothers who come to Stein and to the other rest homes have been sleeping on straw mattresses and chairs for so long in crowded rooms in Bavarian villages that they cannot sleep on soft beds the first few nights.

"It's like heaven," exclaimed one woman. "It's like a fairy story here. It's all light and bright and there is plenty of room and big windows. "Everyone is so friendly—I feel I am loved again."

The small, tired mother spoke with tears in her eyes. She gazed at the pictures on the walls of the dining room, longingly. Her face was lined, but she smiled occasionally as she told of her life in the last few years as a refugee.

Her husband was the manager of a distillery in upper Silesia, now a Russian occupied territory. They had three children. He joined the German army in January, 1945, and was taken prisoner by the Russians. He was sent back to her in October, 1946, ill and depressed. He died a year later.

She and many other women in the village, in the same plight, fled with their children by wagon across the border into the Bavarian forest. They live in peasant houses and villages. Some day they would like to go back home "when the Russians are gone."

Many Can't Get Jobs
They cannot get jobs because of current unemployment. There are about 100,000 such mothers in the area served by the Bavarian Mothers' service. They are allowed about \$12 a month from the government, in an economy where a pair of shoes costs \$8.

"Nobody wants them," said Dr. Nopitsch. "It is worst for those women whose husbands return from Russian camps."

"The man returns, exhausted, without energy, ideas or initiative. He is always thinking about his comrades who were left behind in camp. He is hardened. He does his own sewing. He has been away for so many years that the children don't recognize him as their father. "Imagine what this does to his wife, who has grown old with the cares and worries of trying to make ends meet. Difficulties arise and the neighbors gossip. There are seven million more women than men in Germany, so that the men are encircled by women."

Policemen Sell Blood To Help Fellow Officer

ST. PAUL, MINN.—St. Paul policemen are doing something unique for a unique fellow officer, Alfred E. (Big Al) Jakobson.

Jakobson had one of his lungs removed recently in Rochester, Minn. His officer friends made a deal with the Rochester hospital, which billed Jakobson for \$800. The hospital agreed to take their blood at \$25 a pint and apply it to Jakobson's bill.

Four officers went to Rochester, contributed a pint of blood apiece and knocked \$100 off the bill. Other officers are planning to follow suit. Big Al—he's 6 foot 7—is a familiar figure in the St. Paul loop, where he has been a traffic officer most of the time since 1929.

Always eager to help tourists, Jakobson produced, at his own expense, pocket sized maps of the Twin Cities and handed them to confused visitors.

Then Big Al developed another idea, after night motorists almost clipped him a couple of times.

He sewed reflecting green material on the palm side of his right mitten, and red on the back.

At night he'd halt traffic with a wave of the red, then wave them on by turning and opening his hand.

But more unique among policemen was Jakobson's refusal of a promotion to detective.

Big Al had a good reason. He was studying law nights. If he took the detective rank he'd have to quit his studies to serve a night shift now and then.

He kept his patrolman's rank, worked days and studied nights, right up to the time he became ill.

Just before he got sick he passed an examination for the rank of detective lieutenant. He was certified to that position, but never has had a chance to work at it.

Navy rocket scars 106.4 miles, record for American missiles.

New Method Shows Heart Ills Before Danger Point Nears

ST. LOUIS.—A new means of disclosing heart ailments before they reach the deadly stage is saving many lives, according to Sumner T. Pike, acting chairman of the atomic energy commission. Pike said the method was developed only recently in an atom-radiation study.

"A little piece of research that had no connection with atomic energy has produced what looks like the most highly important discovery in the history of heart disease," Pike said.

He explained that University of California scientists were studying the effect of radiation on the blood of rabbits when they noticed that certain molecules in the blood meant incipient hardening of the arteries.

Pike said the telltale molecules now can be separated from other constituents of the blood by whirling a blood sample around in a centrifuge.

"When the heart trouble is detected in its incipient stage, it can speedily be corrected by dieting," Pike added.

He said after the test was found to work with rabbits, it was tried on 104 "cardiac humans" and 103 responded to the diagnosis.

"This means a complete, definite diagnosis of the principal group of heart diseases with better than 98 per cent accuracy," Pike asserted.

Rookie Cop Creating Crimes for Fun of It

SAN DIEGO.—A rookie policeman who told authorities he "got a bang" out of hearing sirens was accused of creating crimes and finally shooting himself to add realism to a phony bandit scare.

Stanton G. Miller, 28, a marine corps war veteran, was quoted by Sheriff Bert Strand as admitting that while he wore a patrolman's uniform at suburban El Cajon:

He set a haystack afire and started two brush fires.

Made false robbery and burglary reports.

And last night shot himself in the calf of his left leg, and reported he was wounded by one of four men in a car he had stopped for a traffic violation.

Miller was jailed, charged with making false reports—a misdemeanor punishable by a maximum jail term of six months and \$500 fine.

Cripples Once 'Hopeless' Show Handicap Triumphs

WASHINGTON.—Some "hopeless" cripples showed why there's plenty of room for any handicapped person to have hope.

A man with one leg ran a creditable 60-yard dash.

A man with only two stumps for legs, and with no control over either stump, not only walked, but also climbed a stair.

A man who had put on the second of his two artificial legs recently walked jauntily across the room.

All this was part of a demonstration at the national Conference on workmen's compensation and rehabilitation.

It illustrated a change that has come over the thinking on the proper treatment for cripples. In the old days a man with no legs, for example, was taught a job in which he needed no legs.

Now the theory is to give him legs and teach him to stand.

Dr. Henry H. Kessler, West Orange, N. J., and Dr. Josephine J. Buchanan, Fishersville, Va., showed what hard work and patience on the part of both the patients and the doctors can do.

Charles Cook, 30, Keen Mountain, Va., hurt his back in a mine accident in 1943. Paralyzed from the hips down, he couldn't walk for five years.

Then the United Mine Workers welfare fund paid for an operation and for instruction at the Fishersville Woodrow Wilson Rehabilitation center.

"Charlie fell down in the hotel today," Dr. Buchanan said, "and everyone rushed to pick him up. 'Leave him alone,' I said, 'Charlie can get up by himself.'"

Charlie got up by himself.

Nabbed Bank Robber Has Long-Time Record

ST. LOUIS, MO.—A 62-year-old man captured by a woman bank teller has been involved in bank thefts amounting to more than a million dollars, the federal bureau of investigation reported.

William R. Evans was charged with larceny of a bank. Miss Audrey Lorenzen, a blond bank teller, captured him with the help of a passer-by. She chased Evans through downtown streets after more than \$1,500 was taken from her bank.

FBI agent Gerald B. Norris called Evans a notorious "stick man"—one who puts chewing gum or sticky paper on the end of a stick to help grab money in tellers' cages.

Norris said that Evans has a criminal record dating back to 1907, including involvement in a \$590,000 bond theft from the Bank of Manhattan in 1936.

Evans denied the St. Louis theft. He suffered a heart attack following the chase.

"Keeping up with the Jones" held responsible for mental ills.

Electric Groups Opposed to Turn Toward Socialism

Some organized labor groups seem to have awakened to the menace of socialism and government ownership of business.

At their recent convention, 400 delegates of the Utility Workers Union of America, CIO said that government electric-power development which encroaches on the legitimate field of privately owned utilities is "the first step down the socialistic

highway." They passed a resolution saying that Federal power projects offer "conditions inferior to those enjoyed by our members employed in private industry."

An editorial in the Central Missouri Labor News, AF of L, observed: "With a full head of steam, the plan to nationalize the electric power industry is under way. This is an incredible situation."

The fact is—as the CIO group also pointed out—that the control of the electric industry is the key to control of the major industries of the nation. And if the day ever comes when government controls or owns these industries, free labor will be a thing of the past. The unions will be powerless and, at best, will become what amounts to a branch of the government, as has happened in socialist England.

The big unions can bargain on even terms with any business. But they can never be big enough to bargain on even terms with all-powerful government.

THE DIFFERENCE
The optimist says his glass is half full; the pessimist says his is half empty.

HOPE SO
While the process is more painful, at least we're wearing out popular songs a lot quicker.

IDEAL
The ideal wife is one who grows dearer all the time instead of merely more expensive.

It is impossible to rightly govern the world without the Bible.—George Washington.

CHOOSE THE TIRE OF CHAMPIONS... Firestone WINS AGAIN!

27 CONSECUTIVE VICTORIES AT INDIANAPOLIS PROVE FIRESTONE SAFETY AND SUPERIORITY

HERE'S WHY ALL THE DRIVERS IN THIS YEAR'S RACE BOUGHT FIRESTONE TIRES FOR THEIR CARS

GREATER BLOWOUT PROTECTION . . .
Exclusive new Resinous-Plastic Gum-Dipping insulates against internal heat.

STRONGER CORD BODY . . .
Exclusive Safti-Sured Construction provides extra body strength—Tire flexes as unit.

LONGER WEAR . . .
Exclusive Firestone Plus-Mileage Tread Rubber . . . Tougher . . . 15% greater mileage.

SPECIAL THIS WEEK ONLY TO CELEBRATE OUR VICTORY YOU GET AN EXTRA BIG TRADE-IN ALLOWANCE ON FAMOUS FIRESTONE DELUXE CHAMPION TIRES

DON'T TAKE CHANCES . . . GET THIS SAME SAFETY IN THE TIRES ON YOUR CAR Always Buy Firestone DELUXE CHAMPIONS
